2. Rezoning Comments

1. **2020 Land Use Plan** designation call for residential uses on this site.
2. The **concurrent SUP** will establish standards that address any impacts on surrounding properties.
3. The proposed zoning is **harmonious with the zoning of surrounding properties.**
4. The property is located at the intersection of Homestead Road and Weaver Dairy Extension. Properties on **two of the other corners of this intersection are currently zoned R-5-C**, similar to the proposed zoning designation for this project.

**Independent
Senior
Housing**

2. Rezoning Comments

5. No significant **environmental constraints** have been identified that would suggest less intense development.
 6. The location allows future development to take advantage of investment in an **expanded transportation network** including sidewalks, greenways, bike paths, streets, and transit, all of which could support more intense use.
 7. The Future Focus Area designation, recent and proposed development nearby, and Town infrastructure projects nearby suggest changing conditions in the area.
 8. The development achieves various purposes of the Comprehensive Plan increasing the **diversity of housing types, promoting connectivity**, and sustaining healthy neighborhoods.
- Independent
Senior
Housing**

3. Inclusionary Zoning

“This section promotes the public health, safety and welfare of the town by promoting housing of high quality located in neighborhoods throughout the community for households of a variety of income levels, **ages and sizes in order to meet the Town’s goal of preserving and promoting a **culturally** and economically **diverse population** in our community.”**

5. SITE LAYOUT AND BUFFERING

Independent Senior Housing

All impervious surfaces for 1,2,5,10 and 25 year 24 hour events channeled to pond for detention and filtration

6. STORMWATER CONTROL

Independent Senior Housing

During an extreme event like a 100-year storm, there will be an increase in the runoff leaving the site. During such event the earthen spillway will be activated along with the primary spillway. Water will discharge from spillways to the northern edge of the property near Homestead road. Runoff will then travel 50' to an existing roadside culvert at the north west corner

The runoff will travel under Homestead road to an existing draw on the north side of the road. This draw runs 500' and then ties into an unnamed portion of Booker Creek
