Responses to Council Questions**

ITEM #19: Consider Staff Response to Environmental Stewardship Advisory Board Petition Regarding Electrification

Council Question:

Do we have data on how a building's utility costs compare for all-electric v. other energy sources for our area?

Staff Response:

We know that the costs are somewhat case dependent based on a variety of variables (e.g., new construction vs. retrofit, building size and type, existing heating fuel cost vs. electric alternative, etc.). That said, should the Council want us to move forward in our research, this is something we would want to explore in more detail for our area.
