CONDITIONAL ZONING

TOWN OF CHAPEL HILL
Planning Department

Conditional Rezoning applications are reviewed by staff, Planning Commission, and Town Council. The application is part of an open public process that enables Town Council to discuss and decide on the key issues of a rezoning proposal. If a rezoning is approved, the applicant may then submit a detailed final plan application to staff for compliance review with the technical development standards and with the Council rezoning approval.

The establishment of a Conditional Zoning District shall be consistent with the Land Use Plan in the Comprehensive Plan. A proposed Conditional Zoning District is deemed consistent if the proposed District will be located in conformance with an adopted small area plan and/or in one of the following Land Use Categories:

- Medium Residential
- High Residential
- Commercial
- Mixed Use, Office/Commercial Emphasis
- Mixed Use, Office Emphasis
- Town/Village Center
- Institutional
- Office
- University
- Development Opportunity Area
- Light Industrial Opportunity Area

If the proposed conditional zoning districts is located in a Low Residential or a Rural Residential Land Use Category, the Town Council must approve a Land Use Plan amendment prior to proceeding.

SIGNED CONDITIONS: All conditions shall be in writing, prepared by the owner of the property or an attorney and must be signed by all property owners and contract purchasers, if applicable. The Town Attorney may require additional signatures if necessary and will determine whether or not the conditions statement is legally sufficient. Within thirty (30) days after receipt of the conditions the Planning Division Manager will notify the applicant of any deficiencies in the conditions statement or if any additional information is needed. The applicant may make changes to the written conditions statement provided it is submitted at least thirty (30) prior to Planning Commission meeting or thirty (30) days prior to Town Council public hearing.

RECORDATION OF CONDITIONS: After a rezoning has been approved by the Town Council, the conditions statement shall be recorded with the Register of Deeds Office. After a rezoning has been approved by Town Council and recorded by the Register of Deeds Office, the conditions may not be amended except through a new rezoning application.

PROJECT FACT SHEET

TOWN OF CHAPEL HILL

Planning Department

Section A: Project Information

Use Type: (check/list all that apply)

Office/Institutional Residential Mixed-Use Other: _____

Overlay District: (check all that apply)

Historic District Neighborhood Conservation District Airport Hazard Zone

Section B: Land Area

| | | | | |
|--|---|------|-----------|---------|
| Net Land Area (NLA): Area within zoning lot boundaries | | NLA= | 48,110.70 | sq. ft. |
| Choose one, or both, of the following (a or b), not to exceed 10% of NLA | a) Credited Street Area (total adjacent frontage) x ½ width of public right-of-way | CSA= | 4,811.07 | sq. ft. |
| | b) Credited Permanent Open Space (total adjacent frontage) x ½ public or dedicated open space | COS= | | sq. ft. |
| TOTAL: NLA + CSA and/or COS = Gross Land Area (not to exceed NLA + 10%) | | GLA= | 56,921.77 | sq. ft. |

Section C: Special Protection Areas, Land Disturbance, and Impervious Area

Special Protection Areas: (check all those that apply)

Jordan Buffer Resource Conservation District 100 Year Floodplain Watershed Protection District

| Land Disturbance | Total (sq. ft.) |
|--|-----------------|
| Area of Land Disturbance (Includes: Footprint of proposed activity plus work area envelope, staging area for materials, access/equipment paths, and all grading, including off-site clearing) | 63,200 sf |
| Area of Land Disturbance within RCD | 0 |
| Area of Land Disturbance within Jordan Buffer | 0 |

| Impervious Areas | Existing (sq. ft.) | Demolition (sq. ft.) | Proposed (sq. ft.) | Total (sq. ft.) |
|---|---------------------------|----------------------|--------------------|-----------------|
| Impervious Surface Area (ISA) | PROJECT AREA 50,164 sf | 42,981 sf | max 46,544 sf | max 53,727 sf |
| Impervious Surface Ratio: Percent Impervious Surface Area of Gross Land Area (ISA/GLA)% | 74% | | | 75% |
| If located in Watershed Protection District, % of impervious surface on 7/1/1993 | n/a | n/a | n/a | n/a |

Section D: Dimensions

| Dimensional Unit (sq. ft.) | Existing (sq. ft.) | Demolition (sq. ft.) | Proposed (sq. ft.) | Total (sq. ft.) |
|----------------------------|--------------------|----------------------|--------------------|-----------------|
| Number of Buildings | 2 demo, 1 new | 2,939 sf | 92,500 sf | 92,500 sf |
| Number of Floors | 1-2 | | 4-5 | |
| Recreational Space | n/a | | | |

Residential Space

| Dimensional Unit (sq. ft.) | Existing (sq. ft.) | Demolition (sq. ft.) | Proposed (sq. ft.) | Total (sq. ft.) |
|---|--------------------|----------------------|--------------------|-----------------|
| Floor Area (all floors – heated and unheated) | | | | |
| Total Square Footage of All Units | | | | |
| Total Square Footage of Affordable Units | | | | |
| Total Residential Density | | | | |
| Number of Dwelling Units | | | | |
| Number of Affordable Dwelling Units | | | | |
| Number of Single Bedroom Units | | | | |
| Number of Two Bedroom Units | | | | |
| Number of Three Bedroom Units | | | | |

Non-Residential Space (Gross Floor Area in Square Feet)

| Use Type | Existing | Proposed | Uses | Existing | Proposed |
|------------------|----------|----------|------------|----------|-----------|
| Commercial | | | | | |
| Restaurant | | | # of Seats | | |
| Government | | | | | |
| Institutional | | | | | |
| Medical | | | | | |
| Office | | | | | |
| Hotel | 0 | 92,500 | # of Rooms | 0 | up to 135 |
| Industrial | | | | | |
| Place of Worship | | | # of Seats | | |
| Other | | | | | |

| Dimensional Requirements | | Required by Ordinance | Existing | Proposed |
|---------------------------|---------------------------------------|-----------------------|------------|-------------------|
| Setbacks (minimum) | Street | 0 | n/a | 4' |
| | Interior (neighboring property lines) | 8' | n/a | 43.5' |

| X | Written Narrative describing the proposal, including proposed land uses and proposed conditions | | |
| n/a | Resource Conservation District, Floodplain, & Jordan Buffers Determination – necessary for all submittals | | |
| n/a | Jurisdictional Wetland Determination – if applicable | | |
| n/a | Resource Conservation District Encroachment Exemption or Variance (determined by Planning) | | |
| n/a | Jordan Buffer Authorization Certificate or Mitigation Plan Approval (determined by Planning) | | |
| n/a | Reduced Site Plan Set (reduced to 8.5" x 11") | | |

Stormwater Impact Statement (1 copy to be submitted)

- a) Written narrative describing existing & proposed conditions, anticipated stormwater impacts and management structures and strategies to mitigate impacts
- b) Description of land uses and area (in square footage)
- c) Existing and proposed impervious surface area in square feet for all subareas and project area
- d) Ground cover and uses information
- e) Soil information (classification, infiltration rates, depth to groundwater and bedrock)
- f) Time of concentration calculations and assumptions
- g) Topography (2-foot contours)
- h) Pertinent on-site and off-site drainage conditions
- i) Upstream and/or downstream volumes
- j) Discharges and velocities
- k) Backwater elevations and effects on existing drainage conveyance facilities
- l) Location of jurisdictional wetlands and regulatory FEMA Special Flood Hazard Areas
- m) Water quality volume calculations
- n) Drainage areas and sub-areas delineated
- o) Peak discharge calculations and rates (1, 2, and 25-year storms)
- p) Hydrographs for pre- & post-development without mitigation, post-development with mitigation
- q) Volume calculations and documentation of retention for 2-year storm

**CONDITIONAL ZONING APPLICATION
SUBMITTAL REQUIREMENTS
TOWN OF CHAPEL HILL
Planning and Development Services**

- r) 85% TSS removal for post-development stormwater runoff
- s) Nutrient loading calculations
- t) BMP sizing calculations
- u) Pipe sizing calculations and schedule (include HGL & EGL calculations and profiles)

Plan Sets (10 copies to be submitted no larger than 24" x 36")

Plans should be legible and clearly drawn. All plan set sheets should include the following:

- Project Name
- Legend
- Labels
- North Arrow (North oriented toward top of page)
- Property boundaries with bearing and distances
- Scale (Engineering), denoted graphically and numerically
- Setbacks
- Streams, RCD Boundary, Jordan Riparian Buffer Boundary, Floodplain, and Wetlands Boundary, where applicable
- Revision dates and professional seals and signatures, as applicable

Cover Sheet

- a) Include Project Name, Project fact information, PIN, and Design Team

Area Map

- a) Project name, applicant, contact information, location, PIN, & legend
- b) Dedicated open space, parks, greenways
- c) Overlay Districts, if applicable
- d) Property lines, zoning district boundaries, land uses, project names of site and surrounding properties, significant buildings, corporate limit lines
- e) Existing roads (public & private), rights-of-way, sidewalks, driveways, vehicular parking areas, bicycle parking, handicapped parking, street names
- f) 1,000' notification boundary

Existing Conditions Plan

- a) Slopes, soils, environmental constraints, existing vegetation, and any existing land features
- b) Location of all existing structures and uses
- c) Existing property line and right-of-way lines
- d) Existing utilities & easements including location & sizes of water, sewer, electrical, & drainage lines
- e) Nearest fire hydrants
- f) Nearest bus shelters and transit facilities
- g) Existing topography at minimum 2-foot intervals and finished grade
- h) Natural drainage features & water bodies, floodways, floodplain, RCD, Jordan Buffers & Watershed boundaries

**CONDITIONAL ZONING APPLICATION
SUBMITTAL REQUIREMENTS
TOWN OF CHAPEL HILL
Planning and Development Services**

Detailed Site Plan

- a) Existing and proposed building locations
- b) Description & analysis of adjacent land uses, roads, topography, soils, drainage patterns, environmental constraints, features, existing vegetation, vistas (on and off-site)
- c) Location, arrangement, & dimension of vehicular parking, width of aisles and bays, angle of parking, number of spaces, handicapped parking, bicycle parking. Typical pavement sections & surface type.
- d) Location of existing and proposed fire hydrants
- e) Location and dimension of all vehicle entrances, exits, and drives
- f) Dimensioned street cross-sections and rights-of-way widths
- g) Pavement and curb & gutter construction details
- h) Dimensioned sidewalk and tree lawn cross sections
- i) Proposed transit improvements including bus pull-off and/or bus shelter
- j) Required landscape buffers (or proposed alternate/modified buffers)
- k) Required recreation area/space (including written statement of recreation plans)
- l) Refuse collection facilities (existing and proposed) or shared dumpster agreement
- m) Construction parking, staging, storage area, and construction trailer location
- n) Sight distance triangles at intersections
- o) Proposed location of street lights and underground utility lines and/or conduit lines to be installed
- p) Easements
- q) Clearing and construction limits
- r) Traffic Calming Plan – detailed construction designs of devices proposed & associated sign & marking plan

Stormwater Management Plan

- a) Topography (2-foot contours)
- b) Existing drainage conditions
- c) RCD and Jordan Riparian Buffer delineation and boundary (perennial & intermittent streams; note ephemeral streams on site)
- d) Proposed drainage and stormwater conditions
- e) Drainage conveyance system (piping)
- f) Roof drains
- g) Easements
- h) BMP plans, dimensions, details, and cross-sections
- i) Planting and stabilization plans and specifications

Landscape Protection Plan

- a) Rare, specimen, and significant tree survey within 50 feet of construction area
- b) Rare and specimen tree critical root zones
- c) Rare and specimen trees proposed to be removed
- d) Certified arborist tree evaluation, if applicable
- e) Significant tree stand survey
- f) Clearing limit line
- g) Proposed tree protection/silt fence location
- h) Pre-construction/demolition conference note
- i) Landscape protection supervisor note
- j) Existing and proposed tree canopy calculations, if applicable

**CONDITIONAL ZONING APPLICATION
SUBMITTAL REQUIREMENTS
TOWN OF CHAPEL HILL
Planning and Development Services**

Planting Plan

- a) Dimensioned and labeled perimeter buffers
- b) Off-site buffer easement, if applicable
- c) Landscape buffer and parking lot planting plan (including planting strip between parking and building, entryway planting, and 35% shading requirement)

Steep Slope Plan

- a) Classify and quantify slopes 0-10%, 10-15%, 15-25%, and 25% and greater
- b) Show and quantify areas of disturbance in each slope category
- c) Provide/show specialized site design and construction techniques

Grading and Erosion Control Plan

- a) Topography (2-foot contours)
- b) Limits of Disturbance
- c) Pertinent off-site drainage features
- d) Existing and proposed impervious surface tallies

Streetscape Plan, if applicable

- a) Public right-of-way existing conditions plan
- b) Streetscape demolition plan
- c) Streetscape proposed improvement plan
- d) Streetscape proposed utility plan and details
- e) Streetscape proposed pavement/sidewalk details
- f) Streetscape proposed furnishing details
- g) Streetscape proposed lighting detail

Solid Waste Plan

- a) Preliminary Solid Waste Management Plan
- b) Existing and proposed dumpster pads
- c) Proposed dumpster pad layout design
- d) Proposed heavy duty pavement locations and pavement construction detail
- e) Preliminary shared dumpster agreement, if applicable

**CONDITIONAL ZONING APPLICATION
SUBMITTAL REQUIREMENTS
TOWN OF CHAPEL HILL
Planning and Development Services**

Construction Management Plan

- a) Construction trailer location
- b) Location of construction personnel parking and construction equipment parking
- c) Location and size of staging and materials storage area
- d) Description of emergency vehicle access to and around project site during construction
- e) Delivery truck routes shown or noted on plan sheets

Energy Management Plan

- a) Description of how project will be 20% more energy efficient than ASHRAE standards
- b) Description of utilization of sustainable forms of energy (Solar, Wind, Hydroelectric, and Biofuels)
- c) Participation in NC GreenPower program
- d) Description of how project will ensure indoor air quality, adequate access to natural lighting, and allow for proposed utilization of sustainable energy
- e) Description of how project will maintain commitment to energy efficiency and reduced carbon footprint over time
- f) Description of how the project's Transportation Management Plan will support efforts to reduce energy consumption as it affects the community

Exterior Elevations

- a) An outline of each elevation of the building, including the finished grade line along the foundation (height of building measured from mean natural grade)

Conditional Zoning Application

10 November 2021

PROJECT NARRATIVE

This is a request for review of a Conditional Zoning application by the Town of Chapel Hill.

Introduction

The proposed Rosemary / Columbia Hotel project will redevelop a site currently dominated by surface parking and non-descript single story commercial buildings, and redevelop it with a high quality, extended stay hotel in downtown Chapel Hill. The project involves the redevelopment of 7 contiguous parcels in a generally L-shaped configuration: 3 parcels on the north side of West Rosemary, 2 on North Columbia, 1 on Pritchard Avenue, and 1 landlocked parcel with no street address. The project will involve removal of 4 surface parking lots, a small brick building, and a 2-story wood structure. The parcels will be recombined, then subdivided to accommodate a land swap between the developer and the Town. The final address is expected to be 110 West Rosemary Street. The main drive entry and lobby area and public space entries will all be accessible from that frontage as well as from N Columbia Street.

The project will be a 130-135-room, 4 to 5-story hotel with approximately 40 on-site parking spaces. Most will be structured in an under-building deck space, but there will be 5 surface spaces accommodated along the west drive for ride share, and short term parking for check-in and loading. There will also be space on Town land behind Old Town Hall for handicap parking and/or a service vehicle. The hotel will be targeted to extended stay visitors to Chapel Hill, and the facilities are proposed to include public spaces and a rooftop bar. Additional guest common areas will include a business center, guest dining area, meeting rooms, fitness center, and an outdoor recreational area. The hotel's public spaces and common areas will incorporate custom-designed elements that authentically reflect the hotel's downtown Chapel Hill location. These spaces will be accessible from W Rosemary Street.

The proposal includes a land swap with the Town of Chapel Hill to provide a single parcel with a usable building envelope. The land currently owned by the Town is a 7,847 sf narrow parcel at 110 W Rosemary with a 16 space gravel parking lot. The trade would include that narrow parcel becoming part of the hotel project, and an approximately 8,887 sf portion of land fronting Pritchard Avenue and containing a 2-story wood frame house to be deeded to the Town. The project would also include improvements to the driveway behind the Historic Town Hall building and preparation of the lot beside that building to be used as a Town green space or pocket park.

The intent is to end up with an L-shaped parcel zoned TC-2-CZD for the hotel development, and significant enhancement of the Town-owned site around the Historic Town Hall building for the

Town to program. It would also result in the retention of the house on Pritchard which would be owned by the Town.

The project was submitted as a Concept Plan and reviewed by Town staff, the Community Design Commission, and Town Council in September and October 2019. Applicant responses to comments made at those meetings are attached to this application.

Site Description

The site consists of 6 parcels, totaling 49,151 sf. A seventh parcel fronting W Rosemary is currently owned by the Town and will be part of a land swap with a subdivided parcel fronting Pritchard Avenue, for a total of 56,998 sf. The project assumes and requires a parcel exchange with the Town in order to develop the hotel while including an appropriate buffer to the adjacent neighborhood to the north, and enhancing the space around the historic Town Hall building with improvements including a pocket park. In the parcel exchange process, the Town would convey the surface parking lot located at 110 W Rosemary Street to the Developer, and the Developer would convey to the Town a parcel of comparable size comprising the majority portion of the 208 Pritchard Avenue parcel, including a house of historic construction. Post-land swap, the hotel parcel will total 48,111 sf, and the Town-owned homesite on Pritchard will be 8,887 sf. The 8,180 sf pocket park parcel is owned by the Town and will continue to be owned by the Town. The hotel developer intends to develop that site as a small park, and once constructed the park would be maintained and programmed by the Town.

The site is completely developed in small commercial buildings and gravel parking lots. All existing improvements will be removed, except for the home and associated site improvements on the Pritchard property.

The project site located at the edge of the Northside neighborhood, and is bounded by West Rosemary Street to the south, the Historic Town Hall to the southeast, North Columbia Street to the east, a law office to the north, and residential rental properties to the northwest.

The site is fairly flat on the south half, but slopes down approximately 10' along the land toward N Columbia. The project will take advantage of this grade change to provide access along the northern property line to a lower level under building parking and service areas.

Site Access and Circulation

The site is currently accessed via three driveways on W Rosemary and two driveways on N Columbia. The proposed configuration will be a single access point on W Rosemary, with a two-way circulation pattern toward an access onto N Columbia, and toward the under-building parking spaces. This driveway will provide access to the service area at the northwest corner of the building, and will also act as the fire lane.

There will be a short driveway just north of the Historic Town Hall building which will allow for two way traffic, with a right-in / right-out only circulation pattern. This driveway will allow access to the back of Historic Town Hall, and will also allow access to the upper under-building parking level and the driveway to the north.

This will result in the reduction of access points on W Rosemary and provide for a safer pedestrian experience along that frontage.

Per the Town of Chapel Hill LUMO, there is no required parking in the TC zone, but this use will require parking spaces. The under-building parking levels will accommodate approximately 35 parking spaces. There will be 5 surface short term parking spaces west of the building for ride share vehicles and guest loading/check-in. Overflow will be arranged at nearby parking decks via negotiations with the Town and adjacent property owners.

The project is within walking distance of downtown amenities and the UNC campus. The sidewalk in front of the hotel project will be improved with areas between building and back of curb designed to meet the West Rosemary design guidelines, and there will be ample pedestrian circulation routing within the site.

Building Orientation and Site Layout

The proposed L-shaped hotel will have a public presence on W Rosemary Street, which will have access to the hotel lobby and the public spaces. On the top floor of the Rosemary-facing wing will be a rooftop terrace inviting visitors and residents to enjoy the downtown view. The south wing will contain all the public spaces as well as hotel rooms. The FLUM calls for 4 stories at the street on this section of W Rosemary, allowing heights up to 6 stories within the site. This wing is 4 stories facing Rosemary Street, with an outdoor rooftop bar over the 4th story. The building transitions to 5 stories behind that public bar area.

The Columbia-facing wing will contain hotel rooms in 4 stories over the main level parking deck. There will also be a rooftop terrace on the eastern end of this wing for the use of hotel guests. That terrace will face north, east, and south, and will step back at the top floor so that the height on S Columbia is only 4 stories with a rooftop amenity space for guests, and also transitions to 5 stories away from the street. The Columbia wing will also contain lower level parking and hotel services such as trash collection and laundry.

Environmental and Landscaping

The 1.1 acre site contains few trees and is mostly impervious. The redevelopment will include a small amount of additional impervious. There will be new landscaping in the buffers and within the site. There are no stream buffer or RCD zones on the site.

Stormwater

The existing site currently does not have any stormwater treatment. The proposed redevelopment will comply with the current stormwater quality and quantity regulations. The project will comply with all sedimentation and erosion control requirements utilizing on- and offsite protection measures during construction.

Utilities

The project site is currently served by OWASA water and sewer services. The new hotel facility will utilize existing water mains on W Rosemary and sewer mains on N Columbia Street. Additional fire hydrants will be installed as necessary. Existing overhead electric services on site will be removed and relocated underground.

Outline of Modifications requested

The following is list of Modifications to the LUMO that are being requested as part of this Conditional Zoning Application:

1. *Per LUMO section 5.6, landscape buffers would be required on the western and northern property lines of the project.*

There are 3 property lines/landscape buffers required on this project. A Modification to regulations is requested to allow reduction of landscape buffers as follows:

- a) The required northeastern landscape buffer is a 10' width. This is the stretch of property line north of the project driveway. This project is requesting a modification to reduce that to 6', including elimination of canopy trees and reduction of the understory and shrub requirements prorated to 60% of the total requirement.

Justification: The property to the north is also a commercial use, and we propose to install a fence and smaller maturing landscaping at the property line to help screen these two non-residential uses from each other.

- b) The required buffer between the hotel and the residential parcel to the northwest (210 Pritchard) is 20'. We are asking to have this buffer width averaged. The full plant quantity and breakdown is proposed for this space.

Justification: The turning area on the fire lane around the hotel building extends into the buffer area at the southeast corner. The applicant proposes all evergreen plantings at this corner in addition to an opaque fence to screen the hotel use from the residential property and will plant the full quantity of screening material in the buffer zone.

An alternate buffer is requested to allow reduction of landscape buffer widths as follows:

- c) The required buffer between the hotel and the 208 Pritchard parcel is 20'. We are asking to have this buffer reduced to 7' and to allow an opaque fence between the hotel use and the residential use.

Justification: The hotel building has been moved eastward so that it is now 48' from the residential property lines. In order to allow for an efficient and economically viable size hotel and for fire and emergency access that meet the State Fire Code, the fire lane extends into the buffer area. Some landscaping will be provided on the hotel side of the property line and will include the addition of a fence. There will also be some plantings between the driveway and the hotel building in this area.

These buffer reductions are requested on this urban parcel in order to give the site an urban identity and to allow for wide fire lanes to meet State Fire Codes.

2. *Per LUMO section 5.9.6(c), entrance drives shall be bordered by an 8' wide landscape strip and a 5' wide landscape strip is required between the exterior wall of the building and any parking area. A Modification to regulations is requested to allow reduction of these entry and parking lot landscape strips as follows:*

Along the north entry drive from N Columbia Street, we are requesting to average the two requirements in landscape areas that are 6' wide north of the drive and 12' wide south of the drive.

Justification: This fire code requires separation between the fire lane and the building so a wider space is required south of the driveway. The wider buffer on one side also provides enough space for a layered effect giving more depth to the planting pallet.

3. *Per LUMO Appendix B section 1.4, Maximum primary building height in the TC-2 zone of the NCD is 40', and maximum secondary building height is 50'.*

A modification to regulations is requested to allow a secondary height of 65' as the project is on the edge of the NCD zone and across from similarly sized buildings. The project proposes to encroach beyond the secondary building height and solar setbacks of the LUMO for properties within the Northside Conservation District. More specifically, the top floor of the building along portions of both the Rosemary and Columbia wings would encroach beyond this height limit.

Justification: The TC zone on adjacent blocks allows for heights up to 90'. The hotel is 65' at the street, but does consider the residential uses to the north and northwest by notching out the top floor in that corner to create a transition zone between the residential use and the TC zone across Rosemary which will allow for much taller development. The method specified in the ordinance to calculate building height measures the base from the mean ground elevation, meaning that along Rosemary Street the building elevation is measured from 6' below grade, meaning that the pedestrian impression of height in this area is a 4-story building on the Rosemary frontage, with a rooftop bar at the street, and a building that rises to 5 stories as it steps back from the street. Again, on Columbia, that wing is lower at the street frontage and steps back to 5 stories with rooftop use. In this way the building design is following the intent of the West Rosemary guidelines.

Rosemary/Columbia Hotel

Conditional Zoning Application

28 October 2021

06.01.2021 REVISED

STATEMENT OF JUSTIFICATION

The project site is an irregular group of 7 parcels adding up to a little over 1 acre with frontage on both W Rosemary Street and S Columbia Street. The site is located at the central north part of downtown Chapel Hill and wraps around the Historic Town Hall site. The parcel development will be affected by the West Rosemary Development Guide, by the Northside Neighborhood Conservation District document, the Land Use Management Ordinance, and by the Town's overall design guidelines as defined in the Design Manual.

The rezoning is warranted due to changing conditions in this area. The small commercial buildings and surface gravel parking lots are a remnant of decades past where the majority of downtown development happened on Franklin Street. But the development in the past decade of multi-use projects, and the influx of residential uses in the downtown have created an environment where Rosemary Street is an extension of the Franklin Street corridor.

We believe the proposed development is consistent with the goals outlined for the area in the 2020 Comprehensive Plan.

West Rosemary Development Guide

The West Rosemary Development Guide was adopted by the Town in May 2017. The project meets the intent of this plan.

Northside Neighborhood Conservation District

The Northside NCD plan was adopted by the Chapel Hill Town Council in early 2004, with amendments in early 2012. It is a set of land use regulations applied to the development of properties within the district. The proposed development parcel is located at the southeast corner of this district which in this area is bounded by Rosemary Street and South Columbia Street. The proposed hotel project aims to provide an edge to the downtown zone by eliminating the opportunity for off-street vehicular connections into the neighborhood and by improving the pedestrian experience on both West Rosemary and South Columbia streets. The proposed hotel project will not create public amenity space adjacent to the residential neighborhood and will not be targeting the student

population. The project locates service elements like dumpsters into the building and off the street. The project will utilize under building parking and shared parking agreement with the Town and commercial property neighbors to mitigate overflow parking within the neighborhood. Further, the project proposes to remove large surface parking lots from the neighborhood and replace them with green space in the form of a pocket park accessible from both W Rosemary Street and via a short sidewalk, from Columbia Street.

Rosemary/Columbia Hotel

Conditional Zoning Application

28 October 2021

09.24.2020 REV 06.01.2021

STATEMENT OF CONSISTENCY WITH COMPREHENSIVE PLAN

2020 PLAN

The proposed Rosemary/Columbia Hotel project is being designed to comply with the Town's 2020 Comprehensive Plan. We believe the development will meet the 6 goals identified.

- **A Place for Everyone**

The proposed hotel project will provide hotel rooms and public gathering amenities in a site that has the potential to serve as a Gateway to downtown Chapel Hill. It will provide full time and part time employment opportunities, and will complement and support business, retail and dining uses already existing downtown. The project will include enhancement of Rosemary Street and Columbia Street for pedestrians, and will enhance the space around the historic Town Hall by creating a public park (to be owned by the Town) adjacent to it. The hotel will include meeting space available for rent, and a rooftop food and beverage amenity open to the public with a dedicated entrance at the first floor. The hotel will offer extended stay accommodations not currently available in downtown Chapel Hill. (PFE.5)

- **Community Prosperity and Engagement**

The Rosemary/Columbia Hotel development is proposed 130-135 guest rooms and is anticipated to operate with a staff of approximately 30 FTE employees. The developer will collaborate with Empowerment Inc and others to promote hiring from adjacent neighborhoods. The project will increase revenues for the town by creating employment opportunities, generating occupancy taxes, increasing the real estate taxes generated by the project site, and by bringing visitors to downtown Chapel Hill who will support local businesses and the university. It will provide hotel accommodations, meeting spaces for downtown businesses and neighborhood groups, a rooftop terrace for public gathering, and a public pocket park. The park is proposed to include elements that figuratively and literally connect to the Northside neighborhood's masonry heritage. (CPE.1, CPE.2)

- **Getting Around**

The hotel project will be located within walking distance of all the downtown businesses, and also within walking distance to the UNC campus. It is located at a principal intersection that serves as an entryway into downtown, and resides on multiple bus lines so that many non-car transportation alternatives are available. (GA.1, GA.6) Bicycle parking will be available on site for employees and guests.

The project proposes to improve the pedestrian experience on W Rosemary Street and S Columbia Street by the improvement of the sidewalk, reduction of driveway curb cuts to one on W Rosemary and two on S Columbia, addition of street plantings, and the creation of a public park between the new hotel and the adjacent historic Town Hall building. The design team and developer will continue to work with the Town's Urban Designer to explore the possibility of incorporating bike/scooter rental at the park perimeter. (GA.2)

- **Good Places, New Spaces**

The proposed hotel project will provide a pedestrian friendly vibrant space for visitors and residents. It will provide a space for people to work and socialize. (GPNS.2) It will be an infill project in the downtown area, located where underutilized commercial and surface parking infrastructure currently exists, and will provide active interior and exterior spaces. (GPNS.1, GPNS.8) The project will improve the pedestrian experience on W Rosemary street by enlarging the sidewalk, reducing curb cuts in this area from three to one, and adding street-side plantings and a public park / green space.

- **Nurturing Our Community**

The proposed hotel project will redevelop land that is currently mostly surface gravel parking lot. The project will be designed to reflect local architecture that supports the historic Town Hall building, and the addition of public amenities including a rooftop food and beverage amenity and a pocket park adjacent to the historic Town Hall that will enhance the opportunity to repurpose that local historic structure.

The West Rosemary Hotel project is being developed by Chapel Hill Ventures LLC, which is committed to support local businesses and environmentally responsible practices. (NOC.1) The project will efficiently use the site by incorporating parking under the multi-story building (minimizing visibility from the public right-of-way), thereby reducing the impervious footprint. The developer will also enter into agreements to utilize offsite shared parking opportunities with the Town, privately owned parking facilities, or both. The project will meet Town standards in the treatment of stormwater runoff. (NOC.2)

- **Town and Gown Collaboration**

The project will provide a hotel with local flavor located in downtown Chapel Hill within walking distance of the UNC campus. Public and common areas will incorporate elements that authentically reflect the hotel's downtown Chapel Hill location. The project will enhance the W Rosemary / S Columbia intersection adjacent to campus, provide a rooftop gathering amenity that can be used before and after university events, and accommodate campus visitors at the hotel. Chapel Hill Ventures LLC's affiliate, Smart Hotels LLC, specializes in projects that serve both campus and community. (TGC.6)

WEST ROSEMARY DEVELOPMENT GUIDE

The West Rosemary Development Guide was adopted by the Town May 2017.

The proposed project meets the intent of the guidelines in the following ways:

- The building height transitions from the street frontages down toward the residential uses to the north.
- The massing at the northwest corner has been articulated and reduced to reduce the visual massing nearest the residential uses.
- The northwest corner of the site which juts north into the neighborhood, will not have any vertical development, thereby retaining an open area between the neighborhood homes and the hotel building.
- The building steps up from public right-of-way at both Rosemary and Columbia Streets.
- The building architectural design and materials will reflect local spirit
- The non-residential uses increase daytime activity
- The project provides public green spaces and meeting spaces
- The project improves the pedestrian experience and increases pedestrian safety along the street frontage
- The project includes enhancement of the historic Town Hall building setting
- The project incorporates many of the sustainability recommendations such as a higher density and more efficient use of the land, non-surface parking, and promotion of alternative forms of transit.
- The project provides sufficient space and improved and continuous sidewalks for pedestrians along Rosemary and Columbia Streets.
- The project's utility infrastructure, refuse, and parking will be screened or located below the building to minimize visibility from the public right-of-way.
- The project proposes pedestrian scale massing at the sidewalks, variety in the upper cornice heights, and visual breaks in the façade.

Additionally, the project does not encourage negative intrusion into the Northside neighborhood:

- The use is not geared toward student housing
- The project does not increase pedestrian access from W Rosemary Street into the residential neighborhood
- The project directs vehicular traffic toward W Rosemary and S Columbia Streets and not toward the smaller residential streets.

Rosemary/Columbia Hotel

Conditional Zoning Application

10 November 2021

RESPONSE TO COMMENTS FROM COMMUNITY DESIGN COMMISSION

The concept plan was original presented to the COMMUNITY DESIGN COMMISSION for a courtesy review on AUGUST 27, 2019. The formal presentation was made on OCTOBER 22, 2019.

Present were CDC Board Members Chris Berndt, Sue Lyons, Polly Van der Velde, Susana Dancy, Ted Hoskins, Megan Patnaik, John Weis.

Ed Small, the developer's representative, started the presentation and made introductions. Jared Martinson, the architect, went over the program, the Concepts and the key questions

The project was presented as approximately 140 rooms and 80 parking spaces in a 4-5 story building fronting West Rosemary Street. Primary vehicular entry would be from W Rosemary Street with secondary access from S Columbia Street. The project would include a green space adjacent to the Historic Town Hall fronting West Rosemary Street.

Jared specifically asked the board to comment on these four elements:

1. Hotel use
2. Rezoning to allow the proposed FAR and hotel use
3. Height of 5 stories
4. Property exchange.

Questions from board:

Ted Hoskins - wanted to clarify that the property swap is needed to make the project feasible. Ed Small - yes, and the Town gets additional benefits such as the pocket park.

How does the extra height get allowed? Jared Martinson - through a rezoning to TC-2. The west wing has a larger penetration out of the allowed building envelope - why not make the Columbia St wing larger?

Susana Dancy - Who is your typical customer? Ed S - Parents coming in, researchers, med center collaboration, etc. Because it's so close to UNC campus, they would expect the most obvious mode of transportation for guests to be walking. An average stay would be 3 to 5 days, but some transient and some longer stays up to a month would be expected.

Sue Lyons - Asked if Smart Hotels is a brand. Ed S - No, they develop hotels with a local flavor and are not a specific brand.

Asked of Smart hotels does student housing - Ed S - no.

Asked about the raised portion of the roof on S Columbia. Ed Smart - it is public space for the hotel guests. The rooftop restaurant-bar overlooking W Rosemary is a public space, but the guests would have more private outdoor common space on the S Columbia wing.

Megan Patnaik - Asked if the TIA was done. Jared M - Not yet.

Why did the hotel get bigger between August and October? - Jared M - A level was removed from the Columbia Street wing to reduce the perceived height and mass of the building from that viewpoint.

Would the hotel still be economically viable if the building stayed within the allowed envelope? Jared M - unknown

Note: The TIA was done for the CZ submittal and did not identify significant impacts from this project alone. No off site improvements were recommended.

Polly Van der Velde - Have we spoken with the Northside neighbors? Jared M - we're working to schedule a meeting with them in early December. *Note: The design team met with Northside neighborhood residents and representatives at Hargraves Center on Dec 19 2019. We have had additional virtual meetings with the neighbors and several meetings and discussions with Empowerment Inc. We anticipate a virtual meeting with the Jackson Center.*

Response from board:

Ted Hoskins

-Feels extended stay hotel is the most complementary fit to the other hotels nearby which are more of an average 1-2 night stay.

-Likes what he sees

-Would support a taller wing on S Columbia Street to get the massing away from the Northside neighborhood

RESPONSE: The hotel program proposes to offer extended stay accommodations. Since the CDC meeting, the project design has evolved to reduce the Rosemary Street wing from a 5-7 story height to the current 4-5 story height. The Rosemary and Columbia wings are more in balance and include building setbacks from both streets. The hotel building has been shifted east to increase the separation from the adjacent residential property line.

Susana Dancy

-The hotel has a residential feel. Could the hotel be 2 or 3 buildings? The current layout feels like a motor inn.

-Would put the taller element at the street and shorter at the neighborhood. Can the height be articulated? Maybe up to 8 stories in some places? Or put the parking deck in the center and have the hotel wings come out from that central block.

- Parking is too dominant, and surface parking seems inappropriate, particularly at the center of town
- Would a brick wall or gates around the park help create the edge to help define the historic spot
- The Columbia wing will be a terminated vista as you are walking and driving south, so it needs to be really special. Feels that wing could be larger to reduce the massing near the Pritchard side.
- Can the parking structure on S Columbia be turned into a space with pedestrian uses on the street? Concerned about activating this frontage.

RESPONSE: The size of the site and the operational requirements do not allow for multiple buildings. Surface parking at the front and rear have been removed giving the project a more urban feel. The northwest corner has been articulated with a setback and terrace to reduce the building mass adjacent to the residential uses. The design team and developer have been working with the Town's Urban Designer, Brian Peterson to refine the project design. The pocket park will activate the space between the hotel and the Historic Town Hall, and will include Chapel Hill stone walls to define the space, tie into older town design elements, and provide opportunities to connect to Northside's masonry heritage. The development team is continuing to explore options for enhancing the Columbia elevation.

Chris Berndt

- Note that NCD regulations apply.
 - Would like to see north and west views
 - Would like to see the building step down to the neighborhood behind
 - Not sure about rezoning R3 to TC 2
 - 208 Pritchard is very historic. What will happen to it?
 - What are Town's long range plans for Historic Town Hall
 - There were formerly some plans for MLK right of way. Where do those stand?
 - Would like to see the under-building parking lowered completely underground
- RESPONSE: Building elevations illustrating massing, heights, and solar setbacks are included with the Conditional Zoning submittal and include north and west views. The building section closest to the neighborhood had been reduced in height and mass by articulating the northwest corner with a setback and terrace. The upper story will be clad in a dark material to reduce its visual impact. The 208 Pritchard house will be deeded to the Town. All but a few of the project's on-site parking spaces will be located in a parking structure located below the Columbia guestroom wing.*

Sue Lyons

- Likes the roof garden at the AC Hotel and would like to see something similar here.
- Likes the pocket park.
- Supportive of 4-5 stories. But would prefer the west wing remain under 5 stories.
- Supportive of the property exchange so that the Pritchard house will remain and be owned by the Town.
- She lives across from the project and she and her neighbors are excited about the possibility of improvement at that corner

-Doesn't like the access behind the Historic Town Hall building and would prefer it be completely surrounded by green space.

-Appreciates the larger setback on W Rosemary between August and October.

RESPONSE: The access drive between the Historic Town Hall building and the hotel has been reduced so that it is now only 20' wide and traversing along the north side of Historic Town Hall. The entire space along the Rosemary frontage between that building and the new hotel structure will be a public park.

Megan Patnaik

-There is an important opportunity for placemaking around the Historic Town Hall.

Appreciates the pocket park and how a green space will set off that historic building.

-Does not like the parking lot next to the pocket park. Would like all the parking to go underground.

-Would like to create more building facade and less parking on both Columbia and Rosemary to make it feel "cozier" and provide a better street façade

-Concerned about the 52" pecan tree on the Pritchard Street parcel.

-All 4 sides need to be "architecturally superior".

-The Northside NCD was well thought out and hard-fought so she would like to see a response to that in the Rosemary wing, while still keeping an urban edge.

RESPONSE: The surface parking beside the park has been removed.

Hotel construction and land disturbance will remain outside of all but a few feet of the root protection zone for the indicated pecan tree.

Polly Van der Velde

-Likes the proposal to improve grounds at the Historic Town Hall

-Looking for sustainable components like the green roof at the AC Hotel

-She does not like the architecture of the Durham Hotel.

-Would prefer a more elegant building with fewer / more expensive rooms

RESPONSE: The improvements to the grounds around the Historic Town Hall remain in the project.

This hotel will be designed to complement its Chapel Hill location.

John Weis

-Likes the look of their Hilton Garden Inn in Durham

-Feels redevelopment of this space presents a tremendous opportunity and likes what's being proposed in this project.

-Likes how the project sets off but celebrates the Historic Town Hall and feels the green space helps reinforce this

-There is a cupola on top of the Historic Town Hall building. Can the new building frame that element?

-Feels the two 5-story wings nicely frame the Historic Town Hall building, but would like the hotel wings to have larger setbacks so the cupola is visible.

-This use is better than the existing public surface parking, but advocates for under building parking

-Would like to see the building/surface area be more of an urban streetscape

-Feels the 5 story option for the hotel is a better fit with the Northside Community than the taller 7-story option.

RESPONSE: All but a few parking spaces have been moved into the parking deck which is located beneath the building. The remaining area is green space and the park will occupy all the space fronting Rosemary St between the hotel and the Historic Town Hall.

The Chair, Susanna Dancy, noted that these comments are not an endorsement or discouragement of the project but a summary of their comments.

**TECHNICAL
MEMORANDUM - DRAFT**

To
Judy Johnson
Town of Chapel Hill

From
Craig Scheffler, P.E., PTOE
HNTB North Carolina, P.C.

Cc
HNTB Project File

Subject
W. Rosemary Street Hotel – TIA
Update

Date
11/04/2021

Per Town of Chapel Hill (Town) request related to the proposed 108 W. Rosemary Street Hotel redevelopment project, HNTB has completed a transportation impact analysis (TIA) update to address proposed Applicant changes to on-site access, parking, and vehicular circulation. This technical memorandum addresses the changes and how they affect estimated site trip distribution, traffic assignment, and 2023 estimated Build-out Year+1 peak hour operational analysis conditions in the project study area.

Unless noted specifically in this technical memorandum, all 2020 base year and 2023 No-Build scenario assumptions remain unchanged from information provided in the original *West Rosemary Street Hotel - Transportation Impact Analysis* completed and submitted to the Town of Chapel Hill and the North Carolina Department of Transportation (NCDOT) by HNTB North Carolina, PC in May 2021.

Trip Distribution/Assignment Changes

The 108 W. Rosemary Street Hotel Redevelopment project study area is shown on **Figure 1** in **Appendix A** (which contains all the referenced figures in this technical memorandum). The study area for this TIA update remains the same as the original TIA. **Figure 2** shows an updated site plan, which has the following changes to access, parking, and circulation from the original TIA and the site plan originally analyzed for that study:

- The access to W. Rosemary Street is shown as a full movement driveway. In the original TIA, it was an “enter only” one-way driveway. The driveway has also been shifted to the west along W. Rosemary Street further from the NC 86 signalized intersection.
- Similar to the original TIA, there are two access points proposed along NC 86 (Martin Luther King Jr. Blvd). However, the northern most access driveway, originally slated to have full access, is now shown as a full access entry and right-turn only exit. The southern driveway, originally designated to be an “exit-only” one-way driveway, is now shown as a right-turn in/right-turn out only (RIRO) driveway.

- Internal connectivity of the driveways has also changed in relation to their access to two levels of structured parking. In the updated site plan, the W. Rosemary access (upper) driveway will serve drop-off and short-term check-in/check-out functions at the hotel entrance and connect to the northernmost (lower) driveway for access into the lower level of parking and connection to NC 86. The NC 86 RIRO driveway will serve only the upper level of parking.

These access changes are expected to produce some differences in trip distribution to/from each driveway when compared to the previous site plan and original TIA assumptions. **Figure 3** shows the estimated trip distribution for the revised site plan and access configuration. The driveway percentage assumptions are based on external study area network traffic patterns and the most proximal and direct means of accessing the site and on-site parking facilities. **Figure 4** shows the resulting estimated site traffic assignment for the three weekday peak hours analyzed. Trip generation values from the original TIA remain unchanged for this TIA update, as the size of the hotel (number of rooms) is assumed to remain constant (maximum of 145 from the original TIA).

It is important to note that some site traffic may utilize the short-term parking for check-in functions and circle the site, make an external trip onto NC 86 heading northbound and ultimately park in the upper level parking deck. These potential “internal” trip scenarios were not included in site trip distribution/assignment estimates but would likely not cause substantial additional traffic impacts. **Appendix B** contains detailed spreadsheet peak hour traffic volume results for the 2023 revised Build Scenarios, information from the 2020 base year, and 2023 No-Build Condition analyses that are used in calculations of the 2023 Build Scenario traffic volumes. The projected 2023 Build Scenario traffic volumes are shown in **Figure 5**.

2023 Build-Out Year+1 Capacity Analysis Results

Revised 2023 Build (With Site) Scenario capacity analyses were conducted using Synchro models created for the original TIA study. The pertinent changes made to the models are the following:

- 2023 peak hour traffic volumes were adjusted for the driveway intersections and adjacent NC 86 & Rosemary Street intersection, due to site traffic assignment changes.
- Driveway links were adjusted for proposed access laneage, turning movement changes, and location changes based on updated site plan data.

No other changes were made to the Synchro analysis models. Revised and re-optimized signal timings and any other background improvement assumptions made in the original TIA were also included in this analysis. Capacity analysis results, highlighting Level-of-Service (LOS), vehicular delay, and estimated 95th percentile queue information is shown in **Table 1** for the 2023 Build Scenario. **Table 2** provides a summary comparison between the 2023 Build Scenario results, 2020 base year, and 2023 No-Build Scenario results from the original TIA. **Appendix C** contains Synchro signalized capacity analysis output summary reports and **Appendix D** contains the two-way stop-controlled Synchro HCM 6 output summaries for the site driveway intersections.

BOLD/ITALICS – Critical Movement or Overall Intersection Requires Mitigation Per Town TIA Guidelines

* - Worst-Case LOS/Delay for Unsignalized/Stop-Controlled Critical Movement

As shown in **Tables 1 and 2**, the proposed access changes do not cause any substantial differences from operational analysis data reported in the original TIA. The background committed network improvements from the E. Rosemary Street Parking Deck and Office Building projects, along with the W. Franklin Street Lane Reallocation project, which are assumed complete for 2023 No-Build and Build Scenarios, serve to mitigate some operational issues at existing study area intersections. The one intersection experiencing overall LOS and delay deficiencies in the 2023 No-Build PM peak hour scenario (NC 86 & Franklin Street) has limited options for adding capacity. The impacts of the proposed 108 W. Franklin Hotel site traffic are marginal (an increase of one second per vehicle in overall delay). Site driveway intersection operations are all LOS C or better for all of the three peak hours analyzed.

As shown in **Table 1**, there are some potential queue spillback issues at several study area intersections where an individual turning movement is expected to experience lengthy delays that may prevent it from being fully served in one traffic signal cycle. Additional monitoring and adjustment of cycle splits may be necessary to address this issue.

Revised Access Analysis

Revised plans for vehicular site access include the following three proposed site driveway connections to adjacent roadway facilities:

- One full access (upper) driveway is proposed along W. Rosemary Street approximately 200 feet west of the signalized intersection with NC 86 (N. Columbia Street). This driveway will serve the hotel entrance and short-term parking adjacent to the entrance.
- A connecting driveway aisle along the back side of the proposed hotel is to provide a connection to NC 86, approximately 225 feet north of the signalized intersection with W. Rosemary Street. This (lower) driveway access is proposed to be full access entry with exiting movements onto NC 86 limited to right-turns out only. This driveway will provide direct access to the lower level of structured parking and to the hotel entrance/short-term parking on the adjacent side of the hotel building.
- A second driveway along NC 86, located approximately 100 feet south of the lower driveway, is proposed for RIRO movement access to the upper level of structured parking only.

Driveway throat lengths, as shown on the revised site concept plans, should provide adequate distance (approximately 50 feet or more as a minimum) between traffic turning movements at the intersection and internal driveway operations that are related to parking and/or access to the proposed structured parking upper and lower levels.

Driveway distances from the signalized intersection at W. Rosemary Street and NC 86 (N. Columbia Street) are acceptable (200 and 125 feet, respectively), based on recommendations of 100 foot minimum corner clearance as set forth in the 2003 *NCDOT Policy on Street and Driveway Access to North Carolina Highways*. Additionally, the requirement of 100 foot minimum along collector streets (for the driveway along W. Rosemary Street), as required in the 2017 *Town of Chapel Hill Public Works Engineering Design Manual*, is met. The W. Rosemary Street driveway also has 150 feet of separation between it and Pritchard Avenue to the west. The RIRO driveway along NC 86 would not meet the Town spacing requirement for arterial facilities (150 feet minimum). Individual driveway spacing between each driveway and adjacent driveways meets the 50 foot minimum driveway spacing requirement in the Town Design Manual.

Conclusions/Recommendations

Figure 6 shows all planned, committed, and necessary recommended improvements for the project study area based on the 2023 Build Scenario operations analysis results and revised site plan provided by the Applicant.

Planned Improvements

The Town of Chapel Hill *W. Franklin Street Lane Reallocation* project, as described in the original TIA, is assumed to be complete by 2023 for this analysis. In addition to laneage reconfigurations, it was assumed that signal timings along the Franklin Street corridor would be re-optimized.

Background Committed Improvements

The *E. Rosemary Street Parking Deck and Office Building Transportation Impact Analysis* (HNTB, October 2020) had the following as necessary improvements for that study, which have specific impacts on study area intersections listed on the following page. These were considered complete by the 2023 analysis year.

- Re-optimize the NC 86 & Rosemary Street intersection to provide adequate green time for Rosemary Street movements westbound and reduce queuing near the proposed parking deck.
- At the NC 86 & North Street/N. Columbia Street intersection – add a westbound right-turn pocket on North Street and monitor the intersection for signalization. This intersection was assumed to be signalized for all 2023 No-Build and Build scenario analyses for this study.

Applicant Committed Improvements

Based on the revised preliminary site plan and supporting development information provided, there are no proposed external transportation-related improvements adjacent to the West Rosemary Street Hotel – other than the proposed locations and turning movement restrictions at the three site access driveways along the W. Rosemary Street and NC 86 frontage.

Necessary Improvements

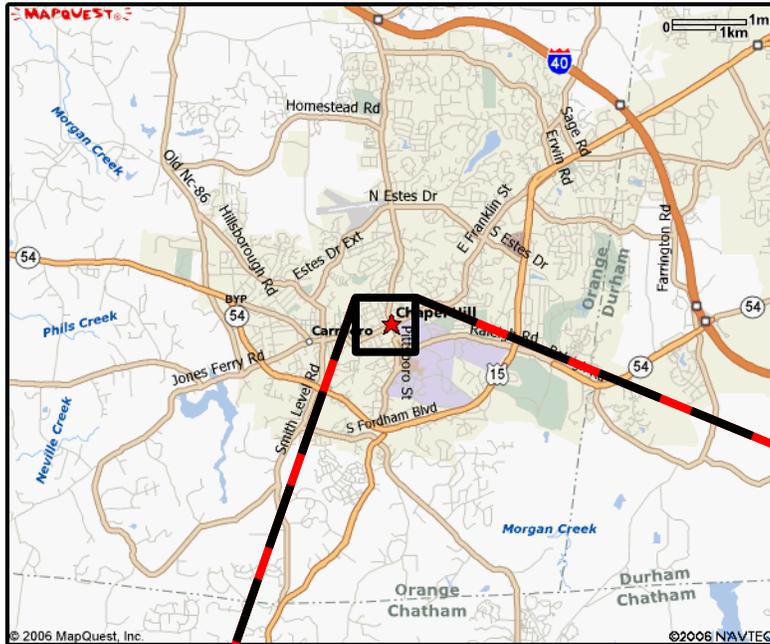

Similar to the findings in the initial TIA, based on the 2023 design year peak hour intersection capacity analyses, only one study area intersection is expected to be over capacity (overall LOS E or F) in any of the three weekday peak hours studied. The intersection of NC 86 (Columbia Street) and Franklin Street is expected to operate at an overall LOS E in the PM peak hour – with or without site-related traffic from the W. Rosemary Street Hotel project. Due to right-of-way limitations, providing additional capacity improvements at this location is not feasible and the traffic signal operations will need to be monitored to mitigate queuing issues, regardless of whether or not the W. Rosemary Street Hotel project is constructed.

2023 Build Scenario queue analysis results indicate that 95th percentile “worst-case” peak hour queues at the NC 86 and Rosemary Street intersection may exceed the proposed driveway access separation distances for the NC 86 RIRO driveway and the W. Rosemary Street full access driveway. Exiting traffic may face longer delays than what is predicted in the Synchro capacity analysis results in some instances, primarily in the PM peak hour.

- One recommended improvement, unrelated to intersection capacity analyses results, is to construct a mountable raised concrete “pork chop” island to limit left-turns out at the proposed Full Access In/Right-Turn Out Only (Lower) site driveway along NC 86 (N. Columbia Street).
- Another recommended improvement is to provide internal wayfinding signage to structured parking areas, particularly for vehicles on-site needing to access the upper level parking garage. These vehicles need to be directed around the rear of the building and make the exiting right-turn onto NC 86 and subsequent right-turn into the upper level RIRO driveway for access into the upper parking level. This maneuver cannot occur if these vehicles initially exit onto W. Rosemary Street.

Intersection Summary

Area Type: CBD
 Cycle Length: 120
 Actuated Cycle Length: 120
 Offset: 41 (34%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green
 Natural Cycle: 85
 Control Type: Actuated-Coordinated
 Maximum v/c Ratio: 0.80
 Intersection Signal Delay: 25.9 Intersection LOS: C
 Intersection Capacity Utilization 65.8% ICU Level of Service C
 Analysis Period (min) 15
 m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

Area Type: CBD
 Cycle Length: 130
 Actuated Cycle Length: 130
 Offset: 54 (42%), Referenced to phase 2:NBT and 6:SBTL, Start of Green
 Natural Cycle: 85
 Control Type: Actuated-Coordinated
 Maximum v/c Ratio: 0.92
 Intersection Signal Delay: 32.9 Intersection LOS: C
 Intersection Capacity Utilization 72.6% ICU Level of Service C
 Analysis Period (min) 15
 # 95th percentile volume exceeds capacity, queue may be longer.
 Queue shown is maximum after two cycles.
 m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

Area Type: CBD
 Cycle Length: 130
 Actuated Cycle Length: 130
 Offset: 0 (0%), Referenced to phase 2:EBT and 6:WBT, Start of Green
 Natural Cycle: 90
 Control Type: Actuated-Coordinated
 Maximum v/c Ratio: 0.79
 Intersection Signal Delay: 41.3 Intersection LOS: D
 Intersection Capacity Utilization 66.4% ICU Level of Service C
 Analysis Period (min) 15

95th percentile volume exceeds capacity, queue may be longer.
 Queue shown is maximum after two cycles.

Intersection Summary

Area Type: CBD
 Cycle Length: 140
 Actuated Cycle Length: 140
 Offset: 54 (39%), Referenced to phase 2:NBT and 6:SBTL, Start of Green
 Natural Cycle: 95
 Control Type: Actuated-Coordinated
 Maximum v/c Ratio: 1.15
 Intersection Signal Delay: 40.5 Intersection LOS: D
 Intersection Capacity Utilization 84.3% ICU Level of Service E
 Analysis Period (min) 15
 ~ Volume exceeds capacity, queue is theoretically infinite.
 Queue shown is maximum after two cycles.
 # 95th percentile volume exceeds capacity, queue may be longer.
 Queue shown is maximum after two cycles.
 m Volume for 95th percentile queue is metered by upstream signal.
