

**01-22-2020 Town Council Meeting  
Responses to Council Questions**

**ITEM #5: Authorize the Town Manager to Submit Design Work to NCDOT for the West Franklin Street Lane Reallocation Project**

**Council Question:**

Does the scope for the analysis include providing information about the potential for different types of bike lanes (i.e. buffered, protected, etc.)? If not, can it be added?

***Staff Response:***

*Yes, information about the potential for different types of bike lanes will be included in the second phase of the analysis – the roadway design alternatives. We will examine a number of different configurations that can fit within the existing curbs (i.e. we are not going to explore alternatives that would require widening the road).*
