To whom it may concern,

For your review and approval, please see the attached documents showing the location and elevation of the proposed J Crew backfill for a vacating tenant. The existing building façade will mostly remain, however a stone knee wall will be added to the suite in order to meet requirements relating to flood proofing in the area. A black awning will be added in following with the existing awnings throughout the center. Please see the attached documentation for further detail.

We look forward to your review and approval and will be happy to discuss any questions or comments relating to this.

Thank you,

Gene A. Beiermann
