---

**Interests & Experiences**

**What perspective(s) do you bring to the board(s), commission(s), committee(s) or task force(s) to which you are applying?**

---

I have been a UNC professor for 13 years, and my research and teaching focus on environmental planning, specifically on ecological restoration, environmental markets, urban flooding, and urban climate adaptation. I have also a Chapel Hill/Carrboro resident since 2007. When I moved here, this region was in the midst of the 2nd drought of record (behind 2001), which definitely gave me an appreciation for how the infrastructure is managed

**Please provide a brief summary of any other relevant qualifications (skills, abilities, interests and/or experience) you bring.**

---

Stormwater Advisory Board: I have worked with CH stormwater employees for years with regards to research and teaching. I have performed many studies of stormwater issues in the Triangle, including work on stormwater utilities. My skills span from planning, GIS, analysis, grant writing, research design, OWASA: I have worked with the OWASA sustainability and planning staff (Mary Tiger, Pat Davis, Ed Holland) for many years, who have taken part in a course I teach on impact assessment. I have a strong interest in water infrastructure and have significant experience with environmental and infrastructure planning.

## Ethics Statement

### ETHICS GUIDELINES FOR TOWN ADVISORY BOARDS AND COMMISSIONS

---

Members of advisory boards and commissions shall not discuss, advocate, or vote on any matter in which they have a conflict of interest or an interest which reasonably might appear to be in conflict with the concept of fairness in dealing with public business. A conflict of interest or a potential conflict occurs if a member has a separate, private, or monetary interest, either direct or indirect, in any issue or transaction under consideration. In addition, members of the Historic District Commission and Board of Adjustment, when these boards are hearing cases, serve as quasi-judicial bodies. Pursuant to State Statute 106A-388(e)(2), members of these boards “shall not participate in or vote on any quasi-judicial matter in a manner that would violate affected persons’ constitutional rights to an impartial decision maker. Impermissible violations of due process include, but are not limited to, a member having a fixed opinion prior to hearing the matter that is not susceptible to change, undisclosed ex parte communications, a close familial, business, or other associational relationship with an affected person, or a financial interest in the outcome of the matter.” Any member who violates these Ethics Guidelines may be subject to removal from the board or commission. If the advisory board or commission member believes he/she has a conflict of interest then that member should ask the advisory board or commission to be recused from voting. The advisory board or commission should then vote on the question on whether or not to excuse the member making the request. In cases where the individual member or the advisory board or commission establishes a conflict of interest, then the advisory board or commission member shall remove themselves from the voting area. Any advisory board or commission member may seek the counsel of the Town Attorney on questions regarding the interpretation of these ethics guidelines or other conflict of interest matters. The interpretation may include a recommendation on whether or not the advisory board or commission member should excuse himself/herself from voting. The advisory board or commission member may request the Town Attorney respond in writing.

## Interests & Experiences

Question applies to multiple boards

## What perspective(s) do you bring to the board(s), commission(s), committee(s) or task force(s) to which you are applying?

---

I was employed by OWASA from April 2012-July 2018 and when I separated I was the Asset Management and Facilities Engineer. I thoroughly enjoyed my experience as an OWASA employee and would like the opportunity to continue to be involved with the utility. I'm currently employed as the City of Raleigh Public Utilities Department Asset Manager. I bring a variety of valuable perspectives. As a water and wastewater professional, I have a deep knowledge and appreciate for all the technical challenges the utility faces. After a little over a year with City of Raleigh Public Utilities, I now have a new perspective on utility operations. I also understand the employee's perspective and concerns on a variety of issues. Finally, as a customer with a family, I appreciate the importance and value of the services provided. I would routinely present and interact with the Board as an OWASA employee, so I am familiar with the responsibilities and duties.

**Please provide a brief summary of any other relevant qualifications (skills, abilities, interests and/or experience) you bring.**

I have over twelve years of experience in the water and wastewater industry and I am a licensed Professional Engineer. I am passionate about water utilities. Also, I pride myself on my ability to work well with others in a team environment and quickly find consensus. My resume is attached with additional details on my work experience. I would encourage you to reach out to any OWASA employee (Ed Kerwin, Pat Davis, Todd Taylor, Mary Darr, Todd Spencer, etc) for a reference.

## **Adam Haggerty, PE**

213 Bluefield Rd, Chapel Hill, NC 27517  
adamnhaggerty@gmail.com  
817-320-0546

### **Education and License**

Bachelor of Science The University of Texas at Austin, Civil Engineering with Honors, Dec 2006  
Licensed Professional Engineer (Civil) in North Carolina, License Number 038613  
Operator Certification: Grade C Apprentice Surface Water, Grade C Distribution (130272), Grade 1 Collections (998612), and Grade 2 Operator-in-Training Biological (1002457)

### **Work Experience**

August 2018 – present

#### **Asset Manager, City of Raleigh Public Utilities Department**

Responsible for City of Raleigh Public Utilities Department asset management program.

April 2012 – July 2018

#### **Asset Management and Facilities Engineer, OWASA**

Responsible for managing and directing OWASA's asset management program. Tasks included preparing and revising the Asset Management Plan, presenting to the Board of Directors, updating asset inventories, documenting condition assessments, updating risk models, leading CIP development and prioritization, reviewing levels of service, analyzing maintenance practices, and forecasting renewal and replacement needs.

Other responsibilities included serving as a project manager and providing technical support throughout organization. Project manager for Dam Emergency Action Plan, WWTP SPCC/SPPP Update, WTP and WWTP Reliability and Risk Assessment. Developed SQL queries for work order reporting (e.g. MTBF, vehicle mileage, work order cost summaries) and SCADA analysis (e.g. distribution pressure trends, pump performance, histogram of peak demands). Wrote python programs using ArcGIS to estimate maximum distribution system pressures and open pipe hydraulic capacity of collection system.

Initially responsible for updating and correcting GIS in addition to providing engineering and technical support. GIS related tasks include mapping water and sewer system GIS using mapping and surveying equipment (total station, receiver, level and rod), locating buried utilities using survey equipment and spatial coordinates data, researching and incorporating utility easements into GIS, automating routine tasks with python programming, updating attribute information, and performing various GIS analysis.

January 2007 - April 2012

#### **Water and Wastewater Engineer-in-Training, URS**

Staff Engineer responsible for assisting with and managing several projects. Leadership tasks included developing and managing schedules and budgets, coordinating out-of-state site visits with multiple team members, supervising subcontractors and coworkers, and training team members. Other tasks included interacting with clients, evaluating wastewater and drinking water system components on-site, collecting geospatial data, generating recommendations and cost estimates for operations and maintenance and capital projects, preparing reports, and developing design drawings and specifications. Team member and leader on the following projects:

- Drinking Water Cross-Connection Control Surveys
- Drinking Water Distribution System Leak Detection Survey
- Oil/Water Separator, Grease Trap, and Septic System Surveys and Management Plans
- Sanitary Sewer Evaluation Surveys
- Wastewater Asset Inventory, Condition Assessment, and Management Plans
- Wastewater System Risk Management Plans

## Interests & Experiences

Question applies to multiple boards

## What perspective(s) do you bring to the board(s), commission(s), committee(s) or task force(s) to which you are applying?

---

I have worked with OWASA over many years as Director of the NC Division of Water Resources, on projects such as approval to construct the Cane Creek Reservoir, obtaining a water allocation from Jordan Lake, and on regional water supply and drought response planning. As a Chapel Hill resident, I have always appreciated the good management and customer service that OWASA provides. My primary interest in serving on the Board would be to take part in the upcoming revision of the long range water supply plan, very important in a growing region such as ours, and to help assure the availability of water from Jordan Lake when needed as a back-up source. I would also like to encourage good regional planning and cooperation for water management. After serving three years on the OWASA Board, my reason to reapply is to see through several critical efforts that are now in process: 1. selecting the new executive director and supporting him or her in getting oriented and well started, 2. Continuing the current effort to initiate and institutionalize good forest management on OWASA lands at Cane Creek to assure a healthy forest and good wildlife habitat, and 3. completion of the update of our long range water supply plan, which involves several choices with great long range importance.

Please provide a brief summary of any other relevant qualifications (skills, abilities, interests and/or experience) you bring.

Please see the attached resume for my professional experience.

## Water Resources Consultant

### Professional Experience

Director, North Carolina Division of Water Resources, 1980-2008

- Advocated the creation of a Division of Water Resources in the North Carolina Department of Environment and Natural Resources, became its first director, and led its development into an effective organization for water supply planning, water allocation, and water project financing.
- Developed an innovative strategy for sustainable water supply planning by river basin and won support for it from local governments and from the General Assembly.
- Led the development of a water use permit program to resolve a long-term problem of unsustainable ground water withdrawals in a 15-county region and achieved consensus with stakeholders and the General Assembly.
- Directed the administration of North Carolina laws on water use permitting, regulation of interbasin transfers, and allocation of water from a federal reservoir, including the development of the necessary administrative rules and managing the associated public comment and environmental assessment processes.
- Led the state's response to exceptional statewide droughts in 2002 and 2007, helping local governments with restricting water use and obtaining emergency water supplies, coordinating reservoir operations with the Corps of Engineers and utility companies, and negotiating an emergency variance in a Federal Energy Regulatory Commission license involving two states and two utility companies.
- Participated in the development of North Carolina legislation on water use registration, regulation of interbasin transfers, water supply planning, drought management, and state financing of water projects, involving drafting bills, consultation with stakeholders, and advocacy in the legislative process.
- Represented the State of North Carolina as the project sponsor for major Corps of Engineers projects, such as deepening Wilmington Harbor and Morehead City Harbor. Negotiated feasibility study cost sharing and project cooperation agreements, budgeted state project funds, and participated in guiding project development.
- Worked out agreements with the Corps of Engineers to give the state as project sponsor a more effective voice in the planning and construction of Corps projects.
- Managed state grants and cost sharing funds for water projects for navigation, flood control, environmental restoration, and beach protection, averaging \$20 million per year.

### Organizations

- Served as board member and chairman of the Interstate Council on Water Policy, an organization of state water management officials.
- Served as board member and chairman of the North Carolina Water Resources Association.

### Awards

- North Carolina Order of the Long Leaf Pine, the Governor's highest award for state service
- Governor's Award for Conservation Achievement
- Department of the Army Commander's Award for Public Service
- Interstate Council on Water Policy Leadership Award
- North Carolina Shore and Beach Preservation Association Lifetime Achievement Award

Question applies to multiple boards

Residency within the Town limits is required for membership on most Council advisory bodies. Memberships of some committees and task forces may be composed of up to forty percent of non-Town residents.

**What district do you live in? \***

Chapel Hill Town limits (Purple)

[Please consult the town maps HERE if you are unsure.](#)

**If you are a Chapel Hill Resident, How long have you lived here?**

Greater than 10 years

---

Question applies to multiple boards

The Council encourages you to visit a meeting of the group that you are interested in serving on. Please choose no more than three groups from the list below to which you would like to apply.

**Which Boards would you like to apply for?**

---

Orange Water and Sewer Authority Board of Directors: Eligible  
Stormwater Management Utility Advisory Board: Appointed

Question applies to Stormwater Management Utility Advisory Board

**Select a Seat Category for the Stormwater Management Utility Advisory Board \***

---

Owners of Single-Family Residential Property within Chapel Hill

Question applies to multiple boards

**Which Board is your First Choice? \***

---

Orange Water and Sewer Authority (OWASA) Board of Directors

---

**How did you find out about this opportunity? (select all that apply)**

---

Internet

If you chose "Other" from the advertising opportunity listed above, please specify specify:

---

**Interests & Experiences**

**What perspective(s) do you bring to the board(s), commission(s), committee(s) or task force(s) to which you are applying?**

---

I bring the perspective of a concerned citizen (and scientist) that is trying to alter my own individual actions to reduce my personal footprint on the climate. I have been an avid user of public transit since I moved to Chapel Hill in about 2004, riding the TTA bus to work from my house off of Highway 54. I currently work in downtown Chapel Hill and often bike or take the bus around town. I drive an electric car and compost all of my organic waste with Compost Now. I think education and reaching out to friends and neighbors is something that can make an impact. For example, my neighborhood of Ironwoods had a community party recently. I asked our HOA board whether or not they would support composting all of the organic waste from this event. Composting is a way to have an immediate impact on reducing methane production, which is a more potent greenhouse gas than carbon dioxide. Everyone was very supportive. Prior to the party, I met with representatives from Orange County and borrowed containers to gather our waste (e.g., compostable plates, napkins, and food waste). I also borrowed utensils from the counties "Fork it Over" program. The effort was a huge success. Though this was a small amount of waste, several neighbors indicated they would try something similar for events they were helping to organize. I take these issues seriously and am willing to put in the effort to make an impact. I applaud Orange County and Town of Chapel Hill for forming this committee and I would be honored to serve as the town's representative.

**Please provide a brief summary of any other relevant qualifications (skills, abilities, interests and/or experience) you bring.**

---

I am a chemist and environmental engineer. I have a bachelors degree in Chemistry. I have a masters degree in Environmental Systems Engineering from Clemson University. I worked at RTI International from 1999 to 2005, as a consultant for the U.S. EPA. I earned a doctoral degree from the UNC School of Public Health in 2011 in Environmental Science and Engineering. After my Ph.D. program, I had a post-doctoral positional at EPA conducting energy system modeling of the biofuels industry. Energy System Modeling is a way to examine the flow of energy from production to utilization. The models I used at EPA take into account not only the use of energy but the emissions that are produced as a consequence. Thus, these models allow users to apply constraints, such as goals for minimizing our emissions, using the least cost options. During my time at EPA, I examined data from the U.S. Energy Information Administration to better understand energy usage patterns (EIA, <https://www.eia.gov>). I believe the goals we set as a committee should target projects that have the biggest reduction in greenhouse gases for the least cost. Tools such as energy system modeling may be more ambitious than what we need to do at a local level, but understanding the quantitative impact of actions we can start to do now, is an important component of prioritizing goals that we set. In addition to my research on the energy system, I also have a strong background in data analysis and visualization. Currently, I run a scientific software start-up in downtown Chapel Hill, Visual Data Tools. My quantitative skills could be an asset to this effort.

## Demographics

The Town Council seeks to attract persons from diverse backgrounds and believes that childcare and transportation is a potential barrier for qualified and interested applicants. See the [Childcare and Transportation Assistance pilot](#) for further details. In order to consider this application and provide some balance to the various boards, this personal information is required:

**Ethnicity \***

---

Caucasian/Non-Hispanic

**Gender \***

---

Female

**If other, please describe:**

---

**Please select your age from the following list. \***

---

35-54

Environmental  
Engineer/Entrepreneur

Occupation

**Are you a caregiver for or identify with a disability?**

---

Yes  No

**Have you participated in the Peoples Academy?**

---

Yes  No

**Are you a Town of Chapel Hill employee?**

---

Yes  No

---

**Ethics Statement**

*Applications will be kept on file from July 1st to June 30th of the same fiscal year. Please reapply each fiscal year if you are still interested in serving on an Advisory Board, Commission, Committee or Task Force and have not yet been appointed.*

STATE OF NORTH CAROLINA  
COUNTY OF ORANGE

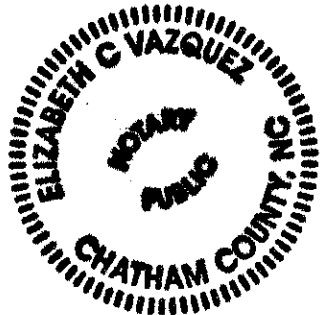

OATH OF OFFICE

I, Pamela Schultz, do solemnly swear (or affirm) that I will support and maintain the Constitution and laws of the United States, and the Constitution and laws of North Carolina not inconsistent therewith, and that I will faithfully discharge the duties of my office as a member of the Stormwater Management, so help me God.  
utility advisory Board

Pamela Schultz  
Signature

The above oaths were subscribed and sworn to before me this the 25<sup>th</sup> day of April, 2017.
