

Consider Amendment to Town's **Green Building Ordinance to Include Architecture 2030 Fossil Fuel Reduction Targets**

Date: June 20, 2018

Staff Recommendation:

Amend Chapter 5, Article VII, of the Town Code of Ordinances known as “The Energy Conservation in Design and Construction of New and Renovated Town Buildings” to include the **Architecture 2030 Challenge** fossil fuel reduction targets

2030 Challenge Targets

Background

- January 31, 2018, petition to Council from Environmental Stewardship Advisory Board (ESAB)
- June 12, 2018, **ESAB unanimously recommends** that Council enact amendment

Fiscal Impact

- Like LEED, Architecture 2030 requirements may increase upfront cost of a project
- Like LEED, additional operational savings are expected over life of the building
- Like LEED, **option for Council** to scale back if project costs increase by more than 7%

Staff Recommendation:

- Amend Chapter 5, Article VII, of the Town Code of Ordinances known as “The Energy Conservation in Design and Construction of New and Renovated Town Buildings” to include the **Architecture 2030 Challenge** fossil fuel reduction targets
- **Enact O-8**
