

Council Question:

Could staff please show why/how the ARPPA non-profit allocations changed? We asked community members and staff to evaluate the projects, now the allocations and projects have changed from last time but we don't have information on why.

Staff Response: We used Scenario 2 from the October 3rd Work Session which had the most support from Council and adjusted it based on the conversation that evening. Staff added the Lethality Assessment Program from Compass Center which garnered a lot of Council interest at that meeting and, to make space for it in the \$1,000,000, asked El Centro Hispano (the largest funding request of the group) to reduce their program by \$100,000. This shifting resulted in the list proposed for approval.

Council Question:

Where is the corrected development activity report? If it's still incorrect, we have to get accurate information out there ASAP.

Staff Response:

The Planning Team is in the process of updating the development activity report.

Council Question:

Where is the downtown ARPPA list?

Staff Response: Below is a chart that staff will present at the Council meeting about Downtown projects based on a request from the Downtown Partnership:

Project

Activity

Funding Estimate

Project	Activity	Funding Estimate
Downtown Partnership Clean & Green Team	Increase cleanliness and safety in Downtown	\$300,000
Streetscape plan	Assess and provide guidance on the future of Downtown streetscape	\$500,000
Peace & Justice Plaza	Redesign plan	\$50,000
Historic Town Hall	Redesign plan	\$50,000
Railings	Replace with design similar to Carolina Square	\$120,000
Adopt-a-Block	Additional projects previously cost prohibitive	\$100,000
	Total	\$1,120,000

Council Question:

The downtown bathroom item is confusing; are we considering funding to keep open 24/7, monitor and clean the current bathrooms until we have the ones open in September?

Staff Response: Downtown bathrooms were a high interest at the 10/3 Work Session for use of ARPA funding. In response, staff sought quotes on pricing for different options for additional bathrooms to supplement the Wallace Deck (and future E. Rosemary Parking Deck) bathrooms. One option is two Portland Loos, one on either end of Downtown, and another is Porta-Potties. The current parking deck bathrooms are only open during the day at this time because of security concerns. In the short term, adding a porta potty in the vicinity of the Wallace Deck could address restroom use after the Deck restrooms are closed for the day.
