Thank you for your correspondence with the Town of Chapel Hill. The Mayor and Town Council are interested in what you have to say. By way of this email, I am forwarding your message to the Mayor and each of the Council Members, as well as to the appropriate staff person who may be able to assist in providing additional information or otherwise addressing your concerns.

If your email is related to a development application or a particular issue being addressed by the Council, your comments will be made part of the record. If applicable, we encourage you to attend any public meetings related to the items addressed in your email.

Again, thank you for your message.

Sincerely,

Jeanette Coffin

Subject: Council Agenda Item Comment

I would like to petition the Council to join me in requesting a public hearing and 60 days extended comment time on the NC Division of Air Quality permit no. 03069T36 which calls for enlarging the significant pollution from the coal fired power plant in the middle of a heavily populated residential area. The deadline for comments is tomorrow, Oct. 25, 2018 so this is an emergency request. I include my letter to the DAQ and the information they have sent me. I serve on the Executive board of Blue Ridge Environmental Defense League and as director of Protect All Children's Environment. We are opposed to approval of this permit and recommend that the plant be replaced with clean safe alternative energy.

Sincerely,

Elizabeth O'Nan

David Hughes
Division of Air Quality
1641 Mail Service Center
Raleigh, North Carolina 27699-1641
David.b.hughes@ncdenr.gov

Mr. Hughes,

As a person disabled by Toxicant Induced Loss of Tolerance I have experienced increased and chronic breathing and other health problems since living in Chapel Hill, North Carolina I am desperately interested in the Air Quality Permit for:

The University of North Carolina at Chapel Hill
1120 Estes Drive Extension
Chapel Hill, North Carolina 27599-1650
Orange County
Application ID 6800043 15A, 15B and 18A
Permit No: 03069T36

Please accept my written request for a public hearing, with the U.S Environmental Protection Agency present. I also request that the public comment period be extended by 60 days to allow time to obtain and review the pertinent records. Please send me the information offered in the public notice: copies of the permit, permit application, all other relevant supporting materials, and all other materials available to DAQ including any notices of violation, fines, reports of non compliance or complaints of health affects or other complaints. If this information is not available on the internet I request that it be made available to the public on a public website. As a disability access provision I request this information be emailed to me at the email address below.

Civic minded citizens are currently engaged in the election process and additional time is needed for us to consider this source of pollution. It is important that a public hearing be allowed to present health information and consider appropriate alternatives as well as consider all aspects of the proposed permit.

I want to make my reasons known in a public hearing why I am opposed to renewal of this permit. I represent a significant sensitive subpopulation of disabled individuals that suffer from Toxicant Induced Loss of Tolerance that deserve to be recognized and heard. We are not disposable. My health has been impaired by the poor air quality in this area. I recently have had surgery and radiation treatment for cancer and can ill afford these additional assaults on my health. I ask that this permit be denied and more appropriate renewable energy such as solar panels be used alternatively. It is unconscionable that a dirty energy source could be allowed to exist and the permit be renewed in this residential area where young people study.

Sincerely,

Elizabeth M. T. O’Nan

=====

Ms. O’Nan,

Thank you for reaching out on this permit issue. The documents associated with this permit renewal are posted in several places on our website, including here:

<https://deq.nc.gov/news/events/public-comment-period-ends-university-north-carolina-chapel-hill>

You’ll find the draft permit, the permit review as well as the applications and the public notice at that link.

To review the full file of associated documents, you can schedule a visit with the Raleigh Regional Office of the Division of Air Quality by calling (919) 791-4200. Please let them know you want to review the files for UNC for Permit no. 03069T36 As the files are extensive, we do not have the ability to scan and upload them, but they are available for public review during normal business hours.

However, I have attached the compliance history report here as well. There were no violations in the last 5 years, but this summarizes any violations beyond that timeframe in our records.

Please let me know if you have any additional questions.

Thank you,
Sharon Martin
