Plan Sets (10 copies to be submitted no larger than 24" x 36")

Plans should be legible and clearly drawn. All plan set sheets should include the following:

- Project Name
- Legend
- Labels
- North Arrow (North oriented toward top of page)
- Property Boundaries with bearing and distances
- Scale (Engineering), denoted graphically and numerically
- Setbacks
- Streams, RCD Boundary, Jordan Riparian Buffer Boundary, Floodplain, and Wetlands Boundary, where applicable

Area Map

- a) Project name, applicant, contact information, location, PIN, & legend
- b) Dedicated open space, parks, greenways
- c) Overlay Districts, if applicable
- d) Property lines, zoning district boundaries, land uses, project names of site and surrounding properties, significant buildings, corporate limit lines
- e) 1,000 foot notification boundary

NARRATIVE

REZONING REQUEST

Eastowne - Medical Office Building

Existing Conditions

The original Eastowne development was constructed with single and two-story office buildings in the 1970's and 1980's. The current, nearly 48-acre site, is strategically located adjacent to I-40 and 15-501 with the Phase 1 development being located at the western intersection of Eastowne Drive and 15-501. The initial medical office building lies in the southeast corner of the site which is bound on the eastern and northern boundaries by a large existing pond and Resource Conservation District (RCD). There are five existing office buildings with associated parking on the site. Four of the buildings will be demolished to create the room for the medical office building and the associated parking deck and site improvements.

Project Plan

The rezoning request to OI-3 is being submitted to allow for an increase in floor area and building height to support the plan to demolish four of the five existing buildings totaling approximately 77,484 gross square feet and construct the 153,000 square foot medical office building and parking deck. The fifth building, totaling 25,546 gross square feet, will remain operational but will eventually be demolished to support full build out of this area.

The proposed 153,000 square foot, 6-story, medical office building will be modern, energy efficient, constructed with a steel frame and skinned with attractive glass curtain wall and storefront systems and complimented with architectural cladding. The skin will be designed to consider the sites prominence at this gateway entrance into Chapel Hill and be consistent with the UNC Health Care brand.

The building will front 15-501 to optimize visibility and create the beginning of a welcoming, urban gateway for this project and to the Town. Parking will be a combination of new or existing surface parking to support the existing building that will remain and structured parking to accommodate patients, staff and visitors for the new medical office building. When completed an approximately 5 ½ story, approximately 580 space parking structure will front along Eastowne Drive with a well landscaped buffer along the street right-of-way. By utilizing structured parking, the initial development will minimize the development footprint and the associated impervious surface area. This also allows a more compact, walkable development that maximizes open and green spaces. Access into the site will be north of the parking deck to reduced conflicts with the traffic at the intersection of Eastowne and 15-501. The internal roads will be designed to allow future extension into the remaining properties to the north and east which are also owned by UNC Health Care to allow for both pedestrian and vehicular interconnections to the future development.

Goals and Objectives

The primary goal of the project is to redevelop this site with modern, higher density medical office uses while creating a prominent gateway into Chapel Hill along 15-501. To achieve these goals, we are now embarking on a design for the buildings that will utilize modern building technologies and construction methods to provide a clean, sophisticated and striking commercial development.

Project timing is also a critically important goal of the development. To stay competitive in the increasingly challenging healthcare landscape, UNC Health Care needs to continue to improve the patient experience. The initial project will consolidate a significant amount of services that are scattered throughout the healthcare system in Chapel Hill while simultaneously upgrading the buildings and improving patient access. Building on UNC Health Care's superb relationship between the Town of Chapel Hill will be instrumental to reach our goal of a Summer 2018 construction start is to be achievable. UNC Health Care is targeting early 2020 to open the first office building.

STATEMENT OF JUSTIFICATION

REZONING REQUEST

Eastowne - Medical Office Building

Existing Conditions

The original Eastowne development was constructed with single and two-story office buildings in the 1970's and 1980's. The current, nearly 48-acre site, is strategically located adjacent to I-40 and 15-501 with the Phase 1 development being located at the western intersection of Eastowne Drive and 15-501. The initial medical office building lies in the southeast corner of the site which is bound on the eastern and northern boundaries by a large existing pond and Resource Conservation District (RCD). There are five existing office buildings with associated parking on the site. Four of the buildings will be demolished to create the room for the medical office building and the associated parking deck and site improvements.

Project Plan

Four of the five existing buildings totaling approximately 77,484 gross square feet will be demolished. The fifth building, totaling 25,546 gross square feet, will remain operational during construction of the first medical office building and parking deck. Building 500 will eventually be demolished to support full build out of this area.

The proposed 153,000 square foot, 6-story, medical office building will be modern, energy efficient, constructed with a steel frame and skinned with attractive glass curtain wall and storefront systems and complimented with architectural precast panels. The skin will be designed to consider the sites prominence at this gateway entrance into Chapel Hill and be consistent with the UNC Health Care brand.

The building will front 15-501 to optimize visibility and create the beginning of a welcoming, urban gateway for this project and to the Town. Parking will be a combination of new or existing surface parking to support the existing building that will remain and structured parking to accommodate patients, staff and visitors for the new medical office building. When completed an approximately 5 ½ story, approximately 580 space parking structure will front along Eastowne Drive with a well landscaped buffer along the street right-of-way. By utilizing structured parking, the initial development will minimize the development footprint and the associated impervious surface area. This also allows a more compact, walkable development that maximizes open and green spaces. Access into the site will be north of the parking deck to reduced conflicts with the traffic at the intersection of Eastowne and 15-501. The internal roads will be designed to allow future extension into the remaining properties to the north and east which are also owned by UNC Health Care to allow for both pedestrian and vehicular interconnections to the future development.

Goals and Objectives

The primary goal of the project is to redevelop this site with modern, higher density medical office uses while creating a prominent gateway into Chapel Hill along 15-501. To achieve these goals, we are now embarking on a design for the buildings that will utilize modern building technologies and construction methods to provide a clean, sophisticated and striking commercial development.

Project timing is also a critically important goal of the development. To stay competitive in the increasingly challenging healthcare landscape, UNC Health Care needs to continue to improve the patient experience. The initial project will consolidate a significant amount of services that are scattered throughout the healthcare system in Chapel Hill while simultaneously upgrading the buildings and improving patient access. Building on UNC Health Care's superb relationship between the Town of Chapel Hill will be instrumental to reach our goal of a Summer 2018 construction start. UNC Health Care is targeting early 2020 to open the first office building.

This project conforms to the general requirements of the Land Use Management Ordinance as well as the policies in the Comprehensive Plan. The use of the parcel will not change as part of the redevelopment; approval of this rezoning will allow for the construction of new, energy-efficient, modern office buildings designed to meet the requirements of the Town's Land Use Management Ordinance.

The subject property is located in the North 15-501 area as described in the Chapel Hill 2020 Comprehensive Plan. This area of Chapel Hill was noted to have areas of redevelopment opportunity due to underutilized commercial capacity. Approval of the subject rezoning will allow denser non-residential development in the North 15-501 Area.

Comprehensive Plans Themes and Goals

1. A Place for Everyone:

Redevelopment of this site will add new medical office to the Town's inventory. The new medical offices will allow for improved levels of medical service to the citizens of Chapel Hill and surrounding areas. Development of the site will also include structured parking which will allow for vertical development of the parcel to lessen the environmental impacts typically caused by areas of sprawling surface parking with associated land disturbance and run-off.

2. Community Prosperity and Engagement:

Development of new, energy-efficient modern medical office facilities will add to the prosperity of the Chapel Hill community by allowing denser non-residential growth in the North 15-501 Area as described in the Chapel Hill Community Plan while requiring minimal additional services.

3. Getting Around:

This redevelopment project is located adjacent to an existing major transportation corridor, US 15-501, which will allow for easy ingress and egress. As this site currently utilized for non-residential purposes, the redevelopment will not have the negative impacts typically associated with new development, such as increased traffic, clearing and grading, and removal of existing mature vegetation.

4. Good Places, New Spaces:

The Eastowne development will add new, modern medical offices to a site that is currently occupied by older, obsolete buildings. The new buildings will be designed to meet the requirements of the Land Use Development Ordinance which will allow for the development of interesting buildings and spaces to serve the citizens of Chapel Hill and surrounding areas.

5. Nurturing Our Community:

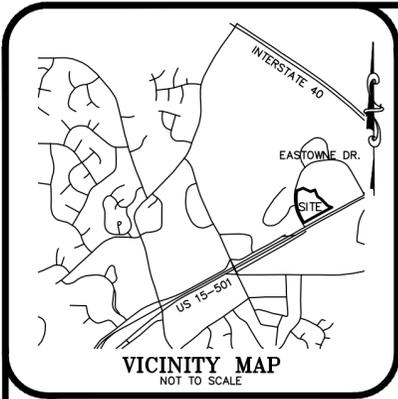

Redevelopment of the subject parcel will enable the construction of upgraded structures, as well as an upgrade on all associated site improvements, such as stormwater controls, impervious surfaces, landscaping, open spaces, etc.

6. Town and Gown Collaboration:

Modern medical office facilities will allow UNC Health Care to better attract young talent to keep them in and around Chapel Hill after graduation. The new buildings will also meet all accessibility requirements so that all citizens are able to utilize the facility without the issues typically found in older office buildings.

Conclusion

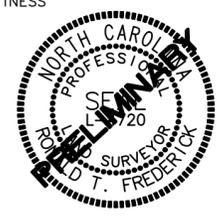

The Eastowne Medical Office building seeks to deliver modern facilities that will improve the attractiveness of the site as well as enhance the medical care provided within. The proposed building meets the requirements of the Land Use Management Ordinance as well as the policy items found in the Chapel Hill 2020 Comprehensive Plan. UNC Health Care Systems has and will continue to be a partner with the Town of Chapel Hill and will work to ensure that this project adds to the vibrancy and to the Town.
