

2020-2021 Percent For Art Plan

FY21 Percent for Art (PFA) Projects

No funds were allocated for PFA in FY21.

Percent for Art Funds were allocated in FY19 as part of the Booker Creek Basin Park project. This new public art installation will be completed in March 2021. Artist Holly Felice is creating four stainless steel sculptures featuring local fauna and positive messages to be mounted on concrete pedestal-based poles rising 10' to 15' above the ground plane. These sculptures will be sited around the park's circular greenway path. This PFA project budget was \$19,568.

FY21 PFA Conservation and Maintenance

This spring, staff propose to use up to \$5,000 of pooled PFA funds to conduct the following conservation and maintenance on existing public artworks:

- *Around Town*, the marble bench at Transit, will be cleaned, re-etched with lithochrome, and sealed; and
- Two sites of the *Elemental Landscape* artworks at Southern Community Park will be renovated and reset – the *Earth* marker and the *Pine Datum*.

FY 2022 Percent for Art Projects

After the FY 2022 Town Budget has been approved, staff will review the FY22 Capital Improvement Plan for PFA eligibility. Any proposed FY22 projects will be presented to Council next year in the 2021-2022 Annual Percent for Art Plan.
