

BUILDING AND DEVELOPMENT SERVICES FEE SCHEDULE - FY25

PERMITS, INSPECTIONS & OTHER SERVICES

NOTICE TO ALL APPLICANTS

PERMIT FEE NOTES

- * The following schedule of permit fees is applicable to the Chapel Hill zoning jurisdiction.
- * Building permit fees are based on the cost of construction unless otherwise indicated and are collected after permit approval for issuance and PRIOR to any work beginning.
- * For all building permits, the General Contractor of record is responsible for paying all permit fees.
- * All fees shall be paid in order to receive a Certificate of Occupancy and final power.
- * Permit fees are broken down into 2 categories: Residential and Commercial. Residential means 1 & 2 Family projects like single family homes, duplexes, townhomes. Commercial means all other projects not considered Residential.
- * Cost of new construction projects will be evaluated against the most current ICC Valuation Table
- * Fees for all Town projects are waived

Building Valuation Data Table

(For the current Building Valuation Data table, see www.iccsafe.org)

For Use in Determining Minimum Total Valuation for Building Permit Fee Calculations

- * The BVD table provides the “average” construction costs per square foot, which can be used in determining permit fees for a jurisdiction. Permit fee schedules are addressed in Section 109.2 of the most current International Building Code (IBC) whereas Section 109.3 addresses building permit valuations. The permit fees can be established by using the BVD table and a Permit Fee Multiplier, which is based on the total construction value within the jurisdiction for the past year. The Square Foot Construction Cost table presents factors that reflect relative value of one construction classification/occupancy group to another so that more expensive construction is assessed greater permit fees than less expensive construction.
- * The BVD is not intended to apply to alterations or repairs to existing buildings. Because the scope of alterations or repairs to an existing building varies so greatly, the Square Foot Construction Costs Table does not reflect accurate values for that purpose. However, the Square Foot Construction Costs Table can be used to determine the cost of an addition that is basically a stand-alone building which happens to be attached to an existing building. In the case of such additions, the only alterations to the existing building would involve the attachment of the addition to the existing building and the openings between the addition and the existing building.
- * *Determination of Total Valuation.* For purposes of determining fees, total valuation shall be either the actual contract price or an applicable amount based on the total square footage of the structure to be built, multiplied by the square foot cost data prescribed on the attached Building Valuation Data Table which is a part of this fee schedule, whichever is greater.

Publicly Assisted Housing Units

- * The Town agrees to waive certain development-related fees related only for the affordable units for projects that provide permanently affordable homeownership opportunities or provide rental housing that remains affordable for at least 20 years. Affordable is defined as being sold or rented to households earning less than 120% of the Area Median Income as determined and approved by the Town. In this case, otherwise applicable Town application fees, building permit fees, plan review fees, inspection fees, and such other development fees and costs which would otherwise be due shall be waived for the affordable dwelling units identified in the application. To qualify for the waiver for rental development, applicants and Town staff must agree on how affordability will be maintained for a 20-year period and an agreement may be required.
- * If application fees are paid for a proposed development that subsequently converts existing approved market rate units to affordable dwelling units in the development plan, a pro rata refund of any such fees that have already been paid shall be provided to the applicant upon approval of the development to reflect the conversion to affordable units. The refunded amount will be determined by the percentage of the affordable units within the development. In addition, any existing development that receives approval to construct new affordable units may have the fees waived for the new affordable units. This refund or waiver does not apply to any market rate units, or to any fees associated with water, wastewater, or stormwater.
- * Town assessed Planning and Building related development fees are waived for service projects by approved non-profits, for a non-profit organization. However, fees required or assessed by the State (current Homeowner’s Recovery Fee) and Orange County (current Recyclable Materials Fee) are still applicable.
- * Fees related to Additional Services are not development or permit fees and are not covered by this blanket fee waiver.

Re-inspection Fees

* All additional inspections made necessary due to failure to comply with applicable code requirements, when projects are not ready for inspection, when recurring deficiencies exist and/or when requested inspections are not cancelled on time, are "re-inspections" and carry a re-inspection fee. Every permit for residential projects will carry a re-inspection fee of \$60. Every permit for commercial projects will be assessed a fee of \$100 for each additional inspection resulting from a failure. Note- Any disputes must be received within 3 business days of the rejection for waiver consideration. Reinspection fees are not considered permit fees and are not eligible for blanket waivers.

Refunds

- * Subpermits are not eligible for refunds
- * Active building permits issued for one and two family dwellings may receive refunds of the permit cost (minus the non-refundable administrative review fee) after permit issuance provided no inspections have occurred.
- * Refunds for zoning approvals/permits will be in accordance with the current refund policy on file with the Planning Dept.
- * The minimum charge for processing one and two family permit refunds is \$75.00
- * Active building permits for all projects other than one and two family dwellings may receive refunds of the permit cost (minus the non-refundable administrative review fee and any plan review fees) after permit issuance provided no inspections have occurred and all original paperwork is returned to the Building Division.
- * The minimum charge for processing other than one and two family permit refunds is \$100.00
- * No refunds will be issued beyond six months from the date of permit issuance for any permit or if inspections have been completed.
- * Fees for Additional Services are required to be paid upfront & before services are rendered and are non-refundable after.
- * BDS staff do not accept nor waive any fees.

Fees are waived for Town of Chapel Hill development applications.

The Town agrees to waive certain development-related fees related only for the affordable units for projects that provide permanently affordable home-ownership opportunities or provide rental housing that remains affordable for at least 20 years. Affordable is defined as being sold or rented to households earning less than 120% of the Area Median Income as determined and approved by the Town. In this case, otherwise applicable Town application fees, building permit fees, plan review fees, inspection fees, and such other development fees and costs which would otherwise be due shall be waived for the affordable dwelling units identified in the application. To qualify for the waiver for rental development, applicants and Town staff must agree on how affordability will be maintained for a 20-year period and an agreement may be required.

If application fees are paid for a proposed development that subsequently converts existing approved market rate units to affordable dwelling units in the development plan, a pro rata refund of any such fees that have already been paid shall be provided to the applicant upon approval of the development to reflect the conversion to affordable units. The refunded amount will be determined by the percentage of the affordable units within the development. In addition, any existing development that receives approval to construct new affordable units may have the fees waived for the new affordable units. This refund or waiver does not apply to any market rate units, or to any fees associated with water, wastewater, or stormwater.

Fees are also waived for service projects by non-profits, for a non-profit organization.

In the case of a Master Plan and a Special Use Permit submitted concurrently, the application fee shall be waived for the application with the smaller fee.

Potential refunds of fees for projects that are withdrawn prior to completing the development review process shall be issued consistent with the Planning Department's adopted internal refund policy.

* based on square footage of floor area

** Changes to an active application, post-completion of an advisory board or council memorandum that results in additional staff review and revisions to staff memorandum.

*** Neighborhood Conservation Districts fees are waived for areas in which it is documented that 51% of the property owners are low to moderate income as defined by HUD.

FY25 FEE SCHEDULE**

STREETS DIVISION

The following policy and fee structure is consistent with ITRE's recommendations.

1. Each utility and private contractor is responsible for street repairs to be made either by the respective utility or its choice from a list of approved sub-contractors.
2. The Town retains the responsibility for inspections of repairs to cuts.

*Fee Assessments:**

- a) \$120 per square yard for each of the first ten square yards
- b) \$50 per square yard for each subsequent square yard
- c) \$30 per square yard for work on gravel roads and/or borings/jackings (open trench/pit area) and/or other work outside the roadway, but within the right-of-way

*These fees are doubled if the street has been resurfaced within the previous two years, or increased one and one half times if the street has been resurfaced within two plus to five years. In addition, on major projects for which the road is severely impacted, especially streets recently resurfaced, the Town may require restoration to include street milling and a complete overlay. Fees may be waived when milling and/or a complete overlay are required.

Penalties:

- a) \$150 for failure to obtain a permit prior to starting the project (not applicable for emergency street cuts).
- b) \$150 for failure to repair initial street cut within thirty calendar days.
- c) \$150 for failure to undertake warranty repair within fourteen calendar days.

The Town requires a 5-year warranty on all cuts and restoration work performed by the utility company or private contractor.

Additional sub-base and pavement restoration work required (beyond the area of trench repair) as a result of a major failure (i.e., water line main break) will be billed at the stated square yard rates above, or \$625 (whichever is the lesser of the two amounts).

This policy referenced above has been phased in since FY 2000-2001.

CHAPEL HILL TRANSIT

The Transit services operated by the Town of Chapel Hill are being provided through the cooperation of the Town of Chapel Hill, the Town of Carrboro, the University of North Carolina, the State of North Carolina, and the United States Government. Therefore, the establishment of user fees will be consistent with both State and Federal regulations, and locally they will be developed in consultation with the Town of Carrboro and the University of North Carolina.

Fees should be established in accordance with the Town's Fiscal Year Cycle.
