Application Type Check all that apply

Minor Work is exterior work that does not involve any substantial alterations, and do not involve additions or removals that could impair the integrity of the property and/or the district as a whole. See Chapel Hill Historic Districts Design Principles & Standards (“Principles & Standards”) (p. 9-11) for a list of minor works. Please contact Town Staff to confirm if you believe the project is classified as “minor work.”

Historic District Commission Review includes all exterior changes to structures and features other than minor works

Maintenance or Repair Work

Minor Work (Defined by Design Standards)

Historic District Commission Review

COA Amendment

Written Description

Describe clearly and in detail the physical changes you are proposing to make. Identify the materials to be used (siding, windows, trim, roofing, pavements, decking, fencing, light fixtures, etc.), specify their dimensions, and provide names of manufacturers, model numbers, and specifications where applicable. Consider including additional materials to illustrate your project, such as: - Photos and specifications for proposed exterior materials such as siding, trim, roof, foundation materials, windows, etc. - Renderings of the proposed work - Spec sheets

We will be using the current cement block foundation and building an enclosed porch. The foundation is original and the current porch was built in 1972. We will use the original CMU foundation block wall with brick veneer as is used around the home. On the street side (facing west), we will be adding two windows that meet the dimensions and style of those on the home. On the south (perpendicular to street) side, there will be three windows slightly viewable from the street. Two of the windows will hold stained glass windows inside simple panes. The third (middle) window is a simple horizontal lean with multiple panes. The current top triangular window will be changed to glass.

Painted solid wood siding and trim will fill out the exterior wall that matches the original house. We will not remove or change the roofing, eaves, or soffits except in the rear of the porch we will add a 4-foot awning that will extend down the stairs.

All proposed materials were found at Home Depot.

Is this application for after-the-fact work?*

Topic

3. Exterior Changes

Brief Description of the Applicable Aspects of Your Proposal

1) Two standard windows as match the house (#20) will face the street as well as a triangular glass paned window above.

2) I am changing exterior trim from the currently listed finger-jointed wood (bad wood for exterior though advertised as such) to the below 1-inch material which we will cut ourselves (or buy narrower boards from the below material) from Home Depot: Model # 662368: 1 inch by 8 inch Southern Yellow Pine

Page / Standard #

Topic

4.8.

2. Building Materials

Brief Description of the Applicable Aspects of Your Proposal

4.8.1. Introduce compatible new additions, as needed, in ways that do not compromise the historic character of the site or district.

BEVELED CEDAR SIDING AND FIBERGLASS MATCHING WOOD FRAME SUBSTITUTE DOUBLE-HUNG WINDOWS THAT WILL BE PAINTED AND TRIMMED TO MATCH THE REST OF THE HOUSE.

4.8.6. Design additions so that their size, scale, and form are compatible with the existing building and do not visually overpower the building on this or adjacent sites.

THE BUILDING WILL NOT BE ANY BIGGER OR SMALLER THAN IT ALREADY IS. ALL SQUARE FOOTAGE IS ALREADY ACCOUNTED FOR. THE OPEN PATIO WILL BECOME AN ENCLOSED STRUCTURE.

4.8.7. Design additions to be compatible with, but discernible from and secondary to, the existing building in their location, size, scale, and building and roof form. a. Limit the size and scale of additions to minimize their visual impact and maintain private open spaces on the site. b. Match the foundation height, style, and materials of an addition to the existing building. **YES SEE ATTACHMENT FROM FITCH LUMBER AND NOTES ON MATERIALS FROM HOME DEPOT.** c. Differentiate the addition from the wall plane of the existing building and preserve existing cornerboards and trim by stepping back the wall plane of the addition and/or utilizing a hyphen or other small-scale transitional element to connect the addition to the existing building. **NOT RELEVANT AS STRUCTURE'S FOUNDATION TO BE REUSED (THERE IS NO HYPHEN OR CHANGE IN THIS WAY).** d. Where additions compete in size with the original building, include a hyphen or small-scale connecting wing or to separate the historic building from its new addition. e. Utilize similar roof forms and pitches for building additions and, when possible, align the height of the eave line of a new addition with the eave line of the existing building. f. Maintain the roof pitch and ridgeline of the existing building. Do not alter or raise the roof ridge of existing buildings in order to accommodate additions. Roof ridges for additions should be secondary to (lower than) those of the main structure **NO CHANGES TOO ROOFLINE. THERE IS ALREADY A NEW ROOF THERE THAT WE WILL KEEP. 4-FOOT AWNING ADDED TO REAR VIEW TO KEEP STAIRCASE DRY/SAFE.**

4.8.10. Design additions and their features with materials that are compatible with, but discernible from and secondary to, the existing building and historic buildings within the immediate surroundings when the features and materials are important in defining the overall historic character of the district. a. Select exterior materials and finishes that are compatible with the original building in terms of scale, dimension, pattern, detail, finish, texture, and color. **PLEASE SEE FITCH WINDOWS ATTACHMENT AND MATERIALS LIST. THE WINDOWS ARE**

#20 ON THE PROPOSED DRAWINGS AND THE SIDING IS A 4" REVEAL ON THE ORIGINAL HOUSE.

gabled porch on square columns with an arched ceiling. A one-story, side-gabled wing on the left elevation faces Hillsborough Street and has six-over-six windows, a half-round window in the gable, and a fifteen-light French door sheltered by a gabled roof supported by exposed purlins on the west elevation. A shed-roofed addition on the south elevation of the side-gabled wing has a six-over-six window on the west elevation and a diamond-paned window on the south elevation. An entrance on the east elevation is sheltered by a shed roof on brackets. There is a one-story, shed-roofed bay at the rear (north) and a stone wall at the street. County tax records date the building to 1932 and the house appears on the 1932 Sanborn map.

C-Building – Shed, c. 1932 – Front-gabled frame shed with shingled exterior matching the house.

208 Hillsborough – House – c. 1910, c. 2005

C – Building

This two-story, front-gabled Colonial Revival-style house is three bays wide and triple-pile with plain weatherboards, a wide cornice with partial cornice returns, deep eaves, and two interior brick chimneys. The house has six-over-one wood-sash windows and a single one-over-one window in the front gable. The entrance, centered on the façade, is sheltered by a near-full-width, hip-roofed porch supported by tapered square columns with a sawnwork railing. A shed-roofed screened porch on the right (south) elevation, constructed after 2002, is supported by square posts and a sleeping porch at the right rear (southeast) corner of the second floor has four-light casement windows. An entrance on the left (north) elevation is sheltered by a shed roof on braces and accessed by a brick stair. Just beyond the stair is a shed-roofed carport on square posts. There is a full-width, one-story, shed-roofed wing at the rear, the north end of which was likely an inset porch, but has been enclosed with fixed and double-hung windows. A low stone wall extends across the front of the property and the driveway. County tax records date the building to 1910 and the house appears on the 1915 Sanborn map, the first to cover this part of Hillsborough Street. The side porch was added after 2002 and the rear porch may have been enclosed at this time.

210 Hillsborough – House – c. 1950

C – Building

Oriented to the north, this one-and-a-half-story, side-gabled, Colonial Revival-style house is three bays wide and double-pile with two gabled dormers on the façade. The house has wood shingles, six-over-six wood-sash windows, a wide molded cornice, flush eaves, and an interior brick chimney. The entrance, centered on the façade, has a four-light transom and is accessed by an uncovered brick stoop. There is a single window in each gable, in each of the pedimented dormers, and in a shed-roofed dormer on the rear (south) elevation. A gabled screened porch projects from the left (east) elevation. The house does not appear on the 1949 Sanborn map, but is typical of post-World War II construction. A portion of the house may have been constructed earlier as a garage, but if so, has been significantly altered.

208 Hillsborough Street

HOUSE

c. 1910, c. 2005

This two-story, front-gabled Colonial Revival-style house is three bays wide and triple-pile with plain weatherboards, a wide cornice with partial cornice returns, deep eaves, and two interior brick chimneys. The house has six-over-one wood-sash windows and a single one-over-one window in the front gable. The entrance, centered on the façade, is sheltered by a near-full-width, hip-roofed porch supported by tapered square columns with a sawnwork railing. A shed-roofed screened porch on the right (south) elevation, constructed after 2002, is supported by square posts and a sleeping porch at the right rear (southeast) corner of the second floor has four-light casement windows. An entrance on the left (north) elevation is sheltered by a shed roof on braces and accessed by a brick stair. Just beyond the stair is a shed-roofed carport on square posts. There is a full-width, one-story, shed-roofed wing at the rear, the north end of which was likely an inset porch, but has been enclosed with fixed and double-hung windows. A low stone wall extends across the front of the property and the driveway. County tax records date the building to 1910 and the house appears on the 1915 Sanborn map, the first to cover this part of Hillsborough Street. The side porch was added after 2002 and the rear porch may have been enclosed at this time.

In the 2015 survey, this was deemed a Contributing Building.

Materials due: 7/7/23

HDC meeting: 8/8/23

Description:

We will be closing in the current screened porch for climate control.

The foundation is original and the current porch was built in 1972. We will use the original CMU foundation block wall with brick veneer as is used around the home.

On the street side (facing west), we will be adding a large 16 pane window with double-hung wood sash windows on each side (3 total). Current top triangular window will be changed to glass. Painted solid wood siding and trim will fill out the exterior wall that matches the original house.

All proposed materials were found at Home Depot.

| Material | Current | Proposed | Manufacturer, Model # |
|----------|---|--|--|
| Siding | Painted solid wood with a 4-inch reveal |  | 11/16 in. x 8 in. x 144 in. Wood Cedar Bevel Siding (6-piece per Bundle) Model #0513512 |
| Windows | | | |

Trim

The house is trimmed with simple solid wood on the outside ranging from 2 to 10 inches wide.

TERMS AND CONDITIONS

I have reviewed all line item quotes in detail and agree that the product specifications and pricing are accurate, and I approve this project for order. I understand that once the order is placed no changes can be made. All orders are non-returnable and non-refundable. I have reviewed the specific installation instructions for each type of unit and understand the necessary requirements to ensure proper function and performance.

Purchaser Sign-off _____ Date: _____

Post Installation Checklist:

***Prior to insulating around the unit, please follow these guidelines to ensure proper function and performance of each unit.

- All units are properly flashed.
- All units have been fully operated and locked/unlocked.
- All hardware and screens are accounted for.
- Report missing parts, damages, defects, and function issues immediately.

IMPORTANT: Do not proceed with exterior trim/siding or interior drywall/trim until these above items have been verified by jobsite supervisor.

PRODUCT AND PERFORMANCE INFORMATION

NFRC energy ratings and values may vary depending on the exact configuration of glass thickness used on the unit. This data may change over time due to ongoing product changes or updated test results or requirements.

The National Fenestration Rating Council (NFRC) has developed and operates a uniform national rating system for the energy performance of fenestration products, including windows and doors. For additional information regarding this rating system, see www.nfrc.org.

NFRC energy values and ratings may change over time due to ongoing product changes, updated test results or requirements.

Review the map below to determine if your units meet ENERGY STAR for your location.
