APPLICATION QUESTIONS

Concept Plan Submittal

July 21, 2022

1. Would this project demonstrate compliance with the Comprehensive Plan?
Compliance with:
 - Small Area Plan – *Complies with the design guidelines described in the 2008 Northern Area Task Force Plan, and with the general mix of uses for the larger area represented in that plan.*
 - Overall Zone / NCD – *N/A*
 - Study Area – *N/A*
 - Land Use Plan – *Complies with the guidelines and design as characterized for the North Martin Luther King Jr Focus Area as described in the Future Land Use Map update December 2020*
2. Would the proposed project comply with the Land Use map?
Yes, the project complies with the 2008 Northern Area Task Force Report and with the December 2020 Future Land Use Map report.
3. Would the proposed project require a rezoning:
Yes.
4. What is the proposed zoning district?
CZ-OI-3. The applicant will work with Planning during the Conditional Rezoning phase to ensure the proposed zoning district is appropriate.
5. Would the proposed project require modifications to the existing regulations?
*Yes. The project has isolated components that will intrude into the 100' landscape buffer against the I-40 corridor.
The project would disturb RCD zones for road and greenway trail installation. Potentially some RCD disturbance will be required for parking / project grading.
The project would include impervious surface in RCD zone for road and greenway trail installation.*
6. If there is a residential component to the project, does the applicant propose to address affordable housing?

Yes. Affordable housing is addressed in the narrative.
 - a. Has the applicant presented its concept plan to the Housing Advisory Board?

No. This will happen during the concept plan review process.

- b. Has the applicant met with appropriate Town staff to discuss affordable housing policy, expectations, and options?

Yes.

- c. Is the project for ownership or rental?

Rental.

7. Are there existing conditions that impact the site design (ie: environmental features such as RCD, slopes, erosion and sedimentation, retention of trees and tree stands, stormwater drainage patterns, significant views into and out of the site)

Yes

There are multiple perennial and intermittent streams running north/south through the property. These all have RCD zones associated with them.

The property is forested. A significant amount of forest will be retained.

The property has multiple utility corridors and related easements – electrical cross-country transmission corridor, more local transmission corridor, sanitary sewer main.

8. Has the applicant addressed traffic impacts? Traffic and circulation issues?

A TIA will be commissioned at the time of formal conditional zoning application.

9. How is the application compatible with the surrounding neighborhood and/or district?

As a multi-family residential project with townhomes and carriage homes, the project is compatible with existing uses and the Town's master planning effort for this and adjacent parcels. Adjacent existing developments include these products.

10. Has the applicant discussed the project with adjacent neighbors?

The developer has started engaging with some neighbors.
