III. PROPOSED FINDINGS OF FACTS AND CONCLUSIONS OF LAW

A. This is an Application to install a generator on the interior of the Delta Delta Delta Sorority property.

B. LUMO Review Criteria H is applicable to this Application, and the proposed generator, because of the location on the lot, will not be visible from the street, and will not be incongruous with the special character of the Franklin-Rosemary District.

And "Minimize the visual impact of new mechanical and communication equipment and utilities by installing them in inconspicuous locations that are not visible from the street and by screening them from view...."

D. The application materials include written and photographic information which suggest that the proposed generator will be screened and will not be seen from any adjacent public right of way and will not alter the appearance and historic fabric of the building.

E.
