

TOWN OF CHAPEL HILL PETITION

We affected citizens urgently petition the Town of Chapel Hill to provide an emergency commission made up of unbiased citizens and experts to address air and water quality affected by existing and planned expansion of the UNC coal plant and to determine UNC's potential contribution and liability for the toxic coal ash disposed of under the Chapel Hill Police Station.

We further petition the Town of Chapel Hill to use their considerable influence to require the University of North Carolina, Chapel Hill, to keep their promise and to convert to solar energy by 2020 and to fulfill their obligation and duty to protect the health and environment of the citizens of Chapel Hill and the students attending UNC-Chapel Hill. And in the interest of mitigating the dangers of climate change, do your utmost to protect public health by not accepting dirty energy as any kind of solution to our energy needs.

Finally, we petition the Town to expeditiously move forward in environmental testing of the Police station coal ash disposal site's affects on water and air and the promised risk assessment and toxicological examinations of the effected population.

We the undersigned urge the Town of Chapel Hill to grant this petition:
