 - 1. The build-to zone is the area on the lot where a certain percentage of the front building façade must be located, measured as a minimum and maximum setback range from the edge of the right-of-way.
 - 2. The required percentage specifies the amount of the front building façade that must be located in the build-to zone, measured based on the width of the building divided by the buildable width of the lot **and applied as follows:**.
 - a. On a lot developed according to the Conventional conditions, the required build-to percentage applies to the primary Frontage. On a corner lot, the required build-to percentage additionally applies to the continuation of the Frontage for a minimum of seventy-five (75) feet around the corner, in accordance with Section 3.11.2.1.D.7. For additional principal structures along secondary Frontages, the streetfacing building façade(s) must meet the maximum setback requirement for at least two-thirds (2/3) of the façade width.
 - b. On a lot developed according to the Enhanced Development conditions, the required build-to percentage applies to all Frontages. Secondary Frontages may have a reduced percentage in accordance with Section 3.11.2.1.D.7.

3. On a Type A Frontage on a corner lot, a building façade, outdoor amenity space, outdoor dining area, and/or building element must be within the build-to zone

 - c. A building step back is not required where a street-facing façade is located <u>at the</u> <u>maximum setback line or</u> outside of the <u>build-to zone maximum setback</u>, and is not the primary frontage of a building that utilizes an upper story bonus, or where a building façade facing the Form District boundary is located more than 20' from the boundary.
- 3. *Module Offset*. The module offset shall be measured as the horizontal change of a portion of the building wall plane at ground level, perpendicular to the applicable frontage. The module width shall be measured for the portion of the wall plane closer to the sidewalk, while the width of offset shall be measured for the portion further from the sidewalk. The dimensions of modules and offsets should maintain a sense of proportion to the building as a whole.
 - a. Offset areas may count towards a build-to zone requirement when the area meets the criteria for a forecourt, outdoor amenity space, or outdoor dining area.
 - b. A module offset is not required where a building façade is located <u>at the</u> <u>maximum setback line or</u> outside of the <u>build to zone</u> <u>maximum setback</u>."
