Discuss Options for the Fordham Boulevard Sidepath Project.

Staff:

Judy Johnson, Interim Director
Bergen Watterson, Transportation Planning Manager
Bill Webster, Planning and Development Manager

Department:

Planning
Parks and Recreation

Overview: The purpose of this item is to present information on design options for a pedestrian and bicycle facility along Fordham Boulevard from Cleland Drive to Willow Drive.

☆ **Recommendation(s):**

That the Council review options for the Fordham Boulevard Sidepath project.

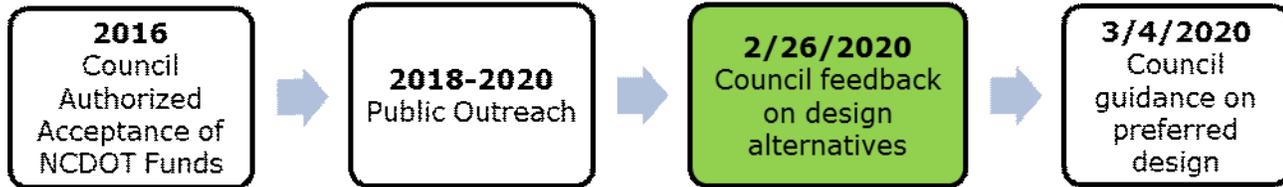

Key Issues:

- Residents of the Little Ridgefield neighborhood (adjacent to the proposed sidepath) have expressed concerns about safety, noise, and loss of vegetative buffer along Fordham Blvd.
- The residents proposed a '[shared street <https://nacto.org/publication/urban-street-design-guide/streets/residential-shared-street/>](https://nacto.org/publication/urban-street-design-guide/streets/residential-shared-street/)' concept from Ridgefield Road to Willow Drive, which would route bicycles and pedestrians onto neighborhood streets where they would share low-speed, low-volume roads with vehicles.
- A design consultant developed three alternate designs for the segment between Ridgefield Road and Willow Drive:
 - A sidepath running along Fordham Boulevard as originally proposed
 - A shared street along Hickory Drive
 - A shared street along Hickory Drive with a sidewalk on one side
- Staff and the consultant have prepared materials to address the noise and vegetative buffer concerns raised by residents.
 - Noise analysis and memorandum

- Illustrated clearing limits for sidepath construction
- Proposed landscape plans, including cross-section diagrams
- Staff will return on March 4, 2020 to ask for Council to approve a design alternative for the project.

Fiscal Impact/Resources: The project has an approved budget of \$1,058,000, which includes \$846,400 in federal funds (80%) and a local match of \$211,600 (20%) from the 2015 Transportation Bond.

Where is this item in its process?
